Dear international researchers,

We would like to invite you and your families to a professionally guided tour:

**Brine, Salt and Boiling pans – Salt Extraction with Tradition.**

The Saline *Luisenhall* in Göttingen's District of Grone is the only salt work in Europa, which produces salt out of brine for various purposes in an old-fashioned way. Since the middle of the 18th century, this way of salt extraction takes place in *Luisenhall*.

The brine will be conveyed from the depth of 460 meters to the surface by natural pressure. Even health spas and swimming pools desire this produce. On a tour through this listed building, you will hear interesting facts about the history and production processes of the saltworks.

**Wednesday, 16.10.2019, 14:00-15:30**

**Meeting Spot: Saline *Luisenhall*, Greitweg 48, 37081 Göttingen.**

(Bus number 41 goes to the bus stop „Saline“)

Please let us know with how many people you would like to participate and please tell any other international guests who would like to participate to get in touch with us:

welcome@uni-goettingen.de

We are looking forward to meeting you again!
