

Guidelines for Credit Calculation

- Requirements for BeCog: Total of 20 C; min 4 C in each module:
 - *Module 1: Acquiring knowledge of and reflecting on research*
 - *Module 2: Technical and methodological basics*
 - *Module 3: Scientific teaching*
 - *Module 4: Scientific communication*
 - *Module 5: Key competencies*
- 1 Credit equals 30 hours total work load
- One day counts as 8 hours
- Attendance, preparation and follow-up are counted

- *Module 1:*
 - Talk at BeCog Colloquium or active participation in Lab meetings/Journal Clubs:
1 C per Semester

- *Module 2 and Module 5*
 - General rule of thumb for workshops:
 - 1 day workshop (8 hours attendance + 8 hours preparation/follow-up): 0.5 C
 - 2 day workshop: 1 C
 - 3 day workshop: 1.5 C
 - The coordinator can adjust the number of credits in case workshops require extensively more or less preparation / follow up.

- *Module 3*
 - Supervising lab rotation / BSc-thesis: 2C
 - Supervising MSc-thesis: 3 C
 - Giving seminars, workshops, practicals, tutorials etc.:
approx. 1 C per SWS, but please consult with the coordinator and supervisor

- *Module 4*
 - Active participation at a conference (talk or poster): 2 C

Please note that the credit calculation here is an approximation and should only be used as a rough guideline. All PhD students should consult with the BeCog coordinator prior to the thesis submission.
