

Göttingen, December 2023

The Division of Agronomy is searching for student assistants from March 2024 on for 10-20 h/month

We are searching for student assistants with 10-20 h/month to support the scientists of the Division of Agronomy in two research projects.

The description of the research projects INFLUX and TRUESOIL are accessible with the following links:

<https://www.uni-goettingen.de/en/truesoil/669648.html>

<https://www.uni-goettingen.de/en/influx/667004.html>

Main tasks:

- Assistance for field work at two experimental fields at Reinshof (N₂O measurements with chambers, soil sampling, monitoring of crop development) as well as the analysis of these samples in the laboratory

Required profile:

- Studies in agricultural sciences (or equivalent)
- Interest in nutrient dynamics and greenhouse gas emissions
- Flexibility regarding the arrangement of working hours (mainly from 8:00 to 12:00)
- Precise way of working
- Team spirit, reliability and high motivation
- English language skills
- Driving license class B

As a student assistant, you will have the opportunity to gain extensive insights into research in the field of Agronomy. Through the involvement in current projects, you will have the chance to deepen your expertise and gain practical experience.

The **duration of employment** is initially 3 months with an option to extend.

Application:

If we have aroused your interest, then send us your documents (information about driving license and languages, enrollment certificate and (if present) Bachelor certificate) **by January 31st, 2024** via email to Paulina Englert (paulina.englert@uni-goettingen.de).
