

Internship opportunity on a French pig farm

We are looking for European agricultural students who would like to complete an internship on our farm in Brittany, France.

Our farm includes:

- 400 breeding sows and pig production
- Free-farrowing maternity units
- Automatic feeding systems
- Agricultural machinery and crop production
- An anaerobic digestion plant
- A young team of approximately 10 employees

The student could participate in animal care, maternity work, feeding, reproduction, farm management, machinery work and general farm activities.

We are open to students enrolled in vocational agricultural education, animal production, farm management, agricultural machinery or equivalent programmes.

Possible internship period: whenever needed

Possible duration: as long as needed

2 at the time is possible, to make it espère for them.

I can provide a detailed internship description and further practical information. (No accommodation...)

Kind regards,

Adèle Picart
