# Nikon F2 with M11 (10 Slides) + M1 (5 Filmholders) + MD2

This is a very rare combination of items. It features a Nikon F2 with a M-2 Motor Winder, a MF-1 Film back for special 250 exposure filmholders (5 included) and a MF-11 Data imprinter with 10 writeable data slides.

The MF-11 allows for imprinting information on every exposure, written on the inserted data slide. A cable for an external power source is soldered to it.

All of the equipment is in very good condition. Due to a lack of batteries, the electronic components could not be tested.

Includes:

- 1 Nikon F2 camera body
- 1 Nikon M2 motor winder
- 1 Nikon MF-1 filmback for 250 exposure filmholders
  - 5 filmholders for MF-1
- 1 Nikon MF-11 Data imprinter
  - 10 MF-11 writeable Data slides (can be cleaned / re-used)
