

GZMB-Kolloquium Mikrobiologie/Genetik

im Wintersemester 2013 / 2014; Zeit: 18.00 Uhr;

Ort: Institut für Mikrobiologie und Genetik, HS MN06, Grisebachstr. 8

22.10.	Paul Fraser, University of Toronto <i>SUMOylation Contributions to Neuronal Form and Function</i>	G. Braus
05.11.	Ines Teichert, Ruhr-Universität Bochum <i>Signaling complexes in fungal fruiting body development</i>	S. Pöggeler
19.11.	Paul Tudzynski, Westfälische Wilhelms-Universität, Münster <i>Host-Pathogen Interaction in the Grey Mould Fungus Botrytis cinerea: Signaling and Development</i>	G. Braus
26.11.	Susanne Häußler, HZI, Braunschweig <i>Antibiotic tolerance of biofilm-grown Pseudomonas aeruginosa</i>	J. Stülke
10.12.	Jürgen Dohmen, Universität zu Köln <i>Complexity of targeting mechanisms in the ubiquitin/proteasome system</i>	G. Braus
17.12.	Jan Willem Veening, Groningen <i>Control of transcription traffic jams by Gre factor determines rate of gene expression</i>	J. Stülke
14.01.	Peter Dürre, Universität Ulm <i>Novel approaches to fermentative production of butanol and acetone</i>	R. Daniel
21.01.	Michael W. Friedrich, Universität Bremen <i>What's up down there?</i> <i>Structure and function of microorganisms in soils and sediments</i>	R. Daniel
28.1.	Ilka Bischofs, Ruprecht-Karls-Universität Heidelberg <i>A network perspective on bacterial quorum sensing</i>	J. Stülke
04.02.	Roland Lill, Philipps Universität Marburg <i>Biogenesis of cellular iron-sulfur proteins and their role in genome integrity</i>	H. Krebber
