# Our Research Group - Computer Security and Privacy (CSP)

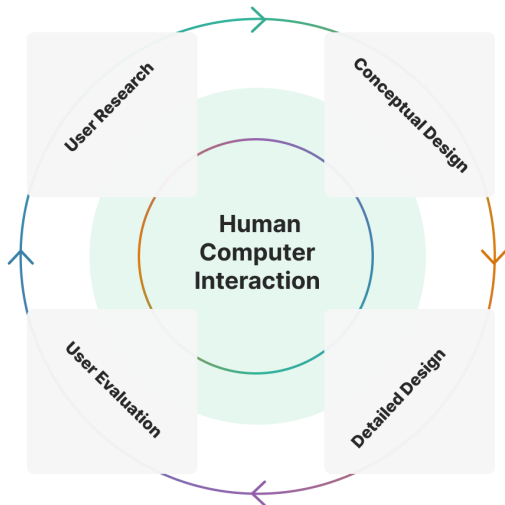

# Table of Content

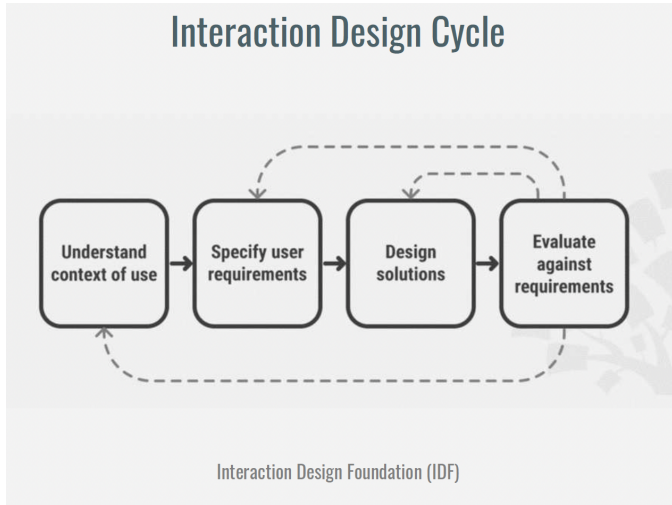

1. Human Computer Interaction Cycle
2. A Study: Left Alone Facing a Difficult Choice
3. A Question!

# Human Computer Interaction Cycle

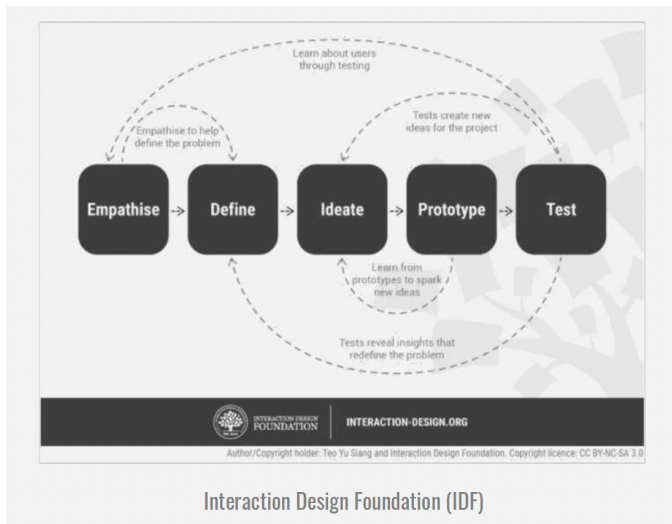

---

# Human Computer Interaction (HCI) Cycle [28]

# Human Computer Interaction (HCI) Cycle [12]

# Human Computer Interaction (HCI) Cycle [28]

- Can you think of methods for the **User Research** phase?
- What about the **User Evaluation** phase?

## **A Study: Left Alone Facing a Difficult Choice**

---

# Left Alone Facing a Difficult Choice [27]

## Problem

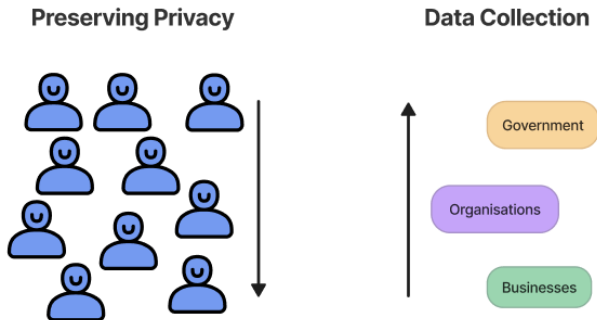

Fig. 1: On going trend

## Why?

- **Increase in collecting users' data, for e.g.:**
  - Targeted Advertising
  - Dynamic Pricing
  - Revenue Optimization
  - Product Development
  - Customer Support
- **Low Privacy Enhancing Technologies (PETs) Adoption, because of e.g.:**
  - Users' general uncertainty [16]
  - Users' unfamiliarity with PETs [24, 29, 22]
  - Users' misconceptions about security and privacy concepts [16]
  - PETs' poor usability [10, 19]

### Interested Individuals

Connection → Gap

### Privacy Enhancing Technologies

For Instance: **80%** of the 257 participants of the study conducted by [2] expressed privacy concerns, while only **6%** had installed privacy-preserving applications on their mobile devices.

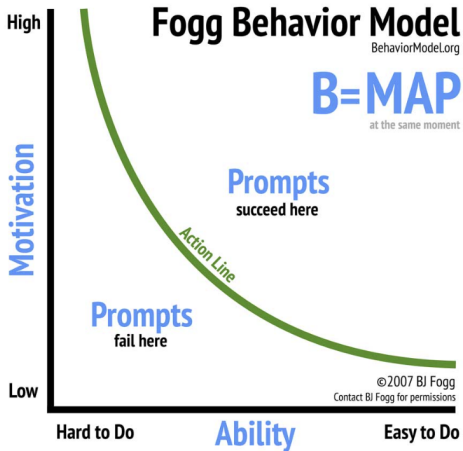

**Research Question:** What are the strengths and weaknesses of websites promoting PETs in supporting individuals in their decisions?

- Personal search - online landscape
- Four PETs
  - Virtual Private Network (VPN)
  - Tor
  - Private Browser (PB)
  - Private Search Engine (PSE)

- 69 websites promoting PETs
  - Single product
  - Comparing product
- 24 criteria in 7 categories, e.g.:
  - Technology explanation
  - Technology limitation and coverage
  - Trust to provider and product
  - Usability
  
- Two experts evaluated and rated websites

- Is anybody familiar with the Fogg Behaviour Model? - Have you ever thought about why we do some "stuff" and why we do not do some other ones? - Have you ever wondered why we choose to do certain things while avoiding others?

# Result

## Single-Product [27]

**Table 2.** Mean score of 45 *single-product* websites. The higher the score (the darker the blue), the better the criterion fulfilled.  $\bar{x}$ : weighted mean, - : not applicable.

		Categories																
		Technology				Trust				Information				Usability				
Number of websites	PETs	Explanation	Coverage	Limitation	Easiness	Speed	Provider	Product	User feedback	Interpersonal	Layout	Presentation variety	Gap coverage	Language formality	Visual design	Demo	Interaction	$\bar{x}$
20	VPN	.4	.2	.1	.3	.6	.5	.5	.9	.3	.6	.3	.4	.5	.8	.6	.0	.4
11	Tor	.5	.2	.2	.2	.3	.5	.3	.2	.0	.4	.3	.2	.5	.5	.5	.0	.3
4	PB	.0	.6	.0	.4	.4	.8	.6	.6	.0	.8	.6	.1	.4	.8	.5	.0	.4
10	PSE	.2	.4	.0	-	.1	.3	.4	.2	.0	.5	.4	.1	-	.5	-	.0	.4
	$\bar{x}$	.4	.3	.1	.3	.4	.5	.4	.5	.1	.5	.3	.3	.5	.7	.6	.0	$\approx \frac{1}{3}$

# Findings

## Multiple-Product [27]

**Table 4.** Mean score of 24 *comparing-product* websites. The higher the score (the darker the blue), the better the criterion fulfilled.  $\bar{x}$  : weighted mean.

		Categories																$\bar{x}$		
		Technology				Trust				Information			Usability			Comparison				
Number of websites	PETs	Explanation	Coverage	Limitation	Easiness	Provider	Product	User feedback	Interpersonal	Presentation variety	Gap coverage	Language formality	Visual design	Demo	Interaction	Review per product	Key benchmarks	Snapshot	Rating per product	
6	VPN	.7	.5	.6	.1	.8	.3	.0	.0	.8	.3	.2	.7	.4	.0	.8	.9	.6	.7	.5
8	PB	.0	.1	.3	.1	.9	.1	.0	.0	.3	.4	.5	.5	.6	.0	.6	.3	.2	.1	.3
10	PSE	.1	.2	.2	.1	.8	.4	.0	.1	.3	.4	.5	.7	.5	.0	.7	.5	.4	.1	.3
$\bar{x}$		.2	.2	.3	.1	.8	.3	.0	.0	.4	.4	.4	.6	.5	.0	.7	.5	.4	.3	$\approx \frac{1}{20}$

Table 6. Mean score of observed accessibility issues

Number of websites	Issues PETs	Impact			Sum
		High	Medium	Low	
26	VPN	22	33	143	198
11	Tor	16	17	82	115
12	PB	20	27	97	144
20	PSE	12	25	62	99
<b>69</b>	$\bar{x}$	<b>18</b>	<b>27</b>	<b>73</b>	<b>147</b>

## All you need to know

Read in 5 min

Easiness

Or watch in 4 min

### How PET1 works? **Explanation**

A user-friendly explanation of how the technology works, best presented through an informative video or visual demonstration. [More about functionality](#)

### What PET1 can do? **Coverage**

An objective explanation of what the PET can do. It can be accompanied by stories and examples. [More about coverage](#)

Or listen in 6 min

### What PET1 can not do? **Limitation**

An objective explanation of what the PET cannot do. It can be accompanied by stories and examples. [More about limitation](#)

### What should I compromise? **Speed**

An explanation of potential effects on the user interaction, such as the speed reduction and changes in the search results.

Presentation variety

### How you can trust us and our product? **Product, trust**

Evidence or explanation of the trustworthiness of the product and provider, such as revenue plans, company, and other business data

## What should I consider when choosing PET? Key benchmarks

- Communicating the key elements users should look into
- The goal is to educate users about the important aspects

## Privacy Enhancing Technologies

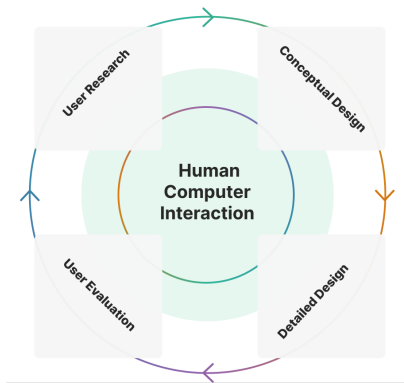

**A Question!**

---

# Question!

Based on what we've learned together, to which stage of the human-computer interaction cycle does this study belong?

# Question

I interviewed a group of privacy and security expert to learn how they might support citizens in enhancing their online privacy and making informed decisions.  
To which stage of the human-computer interaction cycle does this study belong?

# Question

**I plan to recruit members of the general public to visit our lab and interact with various websites that promote PETs, aiming to study these interactions.**  
To which stage of the human-computer interaction cycle does this study belong?

**Thanks** For Your Attention  
Comments and Questions Are Welcome
