

## RDM check list for members of FOR 5522

This checklist is intended to provide a guideline for research data management for all researchers in FOR 5522. The actual implementation and documentation needs to be organized with in each research group. For each project (defined as a scientific effort aimed at a publication), the decisions are made by all authors. For the FOR 5522 projects, the PIs are responsible for RDM implementation. The checklist should typically be used by the first or corresponding author.

**Name:**

**Project:**

**Funded by: DFG FOR 5552,**

**Co-Authors/collaborators:**

**Reference (if applicable):**

### Definitions

**Processed data:** Data as shown in figures in publications and supplementary material, may include additional data such as convergence tests

**Code:** Complex, self-written software

**Metadata:** Information that describes the data (technical information, how was the data produced, etc.)

	Default	Comment
<b>Repository / Sharepoint</b> <ul style="list-style-type: none"> <li>• type of platform: Gitrepo Sharepoint Other</li> <li>• Access granted to collaborators?</li> <li>• Embargo?</li> </ul>	Yes	If yes, why?
<b>Back-up</b> of mobile devices (work laptops)?	Yes
