**Regulation concerning the qualifications for entry and admission
for the consecutive Master's degree programme "International Economics"
at the University of Göttingen**

I. Scope

§ 1 Scope

(1) These regulations stipulate the entry and admission to the consecutive Master's degree programme "International Economics".

(2) The University executes an autonomous procedure for assessing the entry qualifications for all university places to be awarded in the consecutive Master's degree programme "International Economics" in accordance with the following provisions.

(3) ¹If the number of applicants who meet the qualifications for entry exceeds the available places, the university awards the places based on the results of its own selection procedure.

²If the number of applicants who meet the qualifications for entry falls short of the available places, a selection procedure does not take place.

II. Authorisation for entry

§ 2 Qualifications for entry

(1) ¹Applicants seeking admission to the Master's degree programme must demonstrate specialist suitability. ²Candidates are considered to have technical aptitude if they have completed a six semester bachelor degree in a relevant subject with and a scope of at least 180 ECTS credits, or an equivalent degree in a course of study at a German university or a university domiciled in one of the Bologna signatory states, as per section 3 in the course of study Economics or in a technically related subject area. ³The degree examinations, which have been passed in a country other than the Bologna Signatory States, require the assessment of equivalence to the degrees as per sentence 2 in consideration of the proposals by the Central Office for Foreign Education (ZAB) at the office of the permanent conference of the federal ministers of cultural affairs in Federal Republic of Germany (KMK) for the accreditation and assessment of foreign proof of academic qualifications that are laid down at the URL www.anabin.de. ⁴The grades of the foreign proof of academic qualification should be converted to the German grading system.

(2) ¹Notwithstanding section 1, eligibility will be considered proven by applicants who have not yet completed a course of studies at the time of application, but have acquired at least 150 credits in a relevant Bachelor's degree programme as stated in section 3 or in an equivalent degree programme. ²The average grade calculated from the previous examination components is also considered in the selection procedure instead of the bachelor grade or the grade of an equivalent proof of academic qualification, irrespective of whether the result of the Bachelor's examination deviates therefrom.

(3) ¹The decision whether an undergraduate programme is relevant in the meaning of sections 1 to 2 is made by the selection committee. ²Requirement for subject relevance of the undergraduate degree is the proof of at least the following components:

- a) components in Economics with a rating of at least 60 credits, including components in Theory of Economics, Public Finance and Foreign Trade with a total rating of at least 30 credits, under that again. At least 18 credits must be from the modules with average or high academic level, and additionally
- b) components in mathematics or statistics or econometrics with a total rating of at least 12 credits.

³Subject relevance is assessed on the basis of the documents to be submitted along with the application as well as suitable criteria, such as the teaching contents, the used literature, the

module prerequisites, the study and examination regulations and the schedule of the degree programme, in which the component was accomplished. ⁴The selection committee may require the completion of pending examination components under sentence 2 within two semesters for assessing the subject relevance; in this case, assessment of subject relevance and the entry is subject to termination until proof of the pending examination components, which should be submitted within two semesters from the time of enrolment at the university (final deadline). ⁵If the proof of the pending examination components is not submitted within the deadline, the assessment of the subject relevance and a related letter of admission will become ineffective. ⁶Confirmation of subject relevance shall not be possible if the pending examination components under sentence 2 have a rating of more than 15 credits.

(4) ¹Applicants, who neither meet a German university entry requirement nor have acquired their Bachelor's degree or an equivalent degree at a German university, must show sufficient proficiency in the German language. ²Proof hereof is demonstrated through a test with the grade point average DSH-2 in accordance with the examination regulation for the German language test for university admission of foreign prospective students (DSH). ³The obligation to take the test need not be met by applicants, who are exempted from the German language test for admission to colleges and universities according to the examination regulations for the German language test for the admission of foreign students to colleges and universities (DSH) at the Georg-August-Universität Göttingen this applies especially to those applicants, who have proven the required German language skill through the "Test of German as a Foreign Language" (TestDaF) with at least four-times TestDaF grade level 4 (TDN 4) or the "German examination module" of the assessment test during the preparatory course.

(5) ¹Applicants whose native language is not English must show very good English language skills. ²Very good English language skills must be demonstrated with standardised or accredited certificates at minimum C1 level in accordance with the Common European Framework of Reference for Languages (CEFR) or comparable achievements; the following shall serve as proof:

⁴Successful completion of the tests may not be more than three years before submission of the application for admission to the Master's degree programme. ⁵Exempt from the obligation to provide proof of a test are applicants who can provide evidence of
