

Seminar Sedimentology & Sedimentary Petrology

SoSe 2022, Tuesday, 16:15

The seminar will be held in presence in room 16-5 or online as video conference via BBB (will be communicated on short notice)

- 31.5. Carsten Benner
Screening for traces of Paleoproterozoic (ultra)high-pressure metamorphism in Western Greenland: Clues from modern sand heavy-mineral assemblages and garnet chemistry
- 7.6. Róbert Arató
Progress and further challenges in automated fission-track analysis via artificial intelligence (FTAIGE).
- 21.6. diverse...
Presentations for the WGSG meeting in Milano
- 5.7. Hagen Hoemann
Titanite as tracer in sedimentary provenance analysis
- 12.7. Hilmar v. Eynatten & István Dunkl
Exploring hidden archives: Continental rest sediments on karstified surfaces in Central Europe
- 19.7. Niklas Keller
Fe-isotope signatures of suspended matter in the Baltic Sea water column
