

Directory of Modules

zu der Prüfungs- und Studienordnung für den Applied Data Science (Master of Science) (Amtliche Mitteilungen I 17/2022 S. 222)

This is a translation of the directory of modules as promulgated in Official Bulletin II No. 09, p. 11111, dated October 11, 2022.

Only those regulations published by the Georg-August-Universität Göttingen in its Official Bulletins are legally binding. Any claims to rights or titles resulting from the English translation of these regulations are expressly excluded.

NICHT-AMTLICHE ÜBUNG

NICHT-AMTLICHE FASSUNG

Modules

B.Bio.113: Angewandte Bioinformatik.....	11126
B.DH.01: Einführung in die digitale Text- und Sprachanalyse.....	11127
B.DH.01a: Einführung in die digitale Text- und Sprachanalyse.....	11128
B.DH.02: Einführung in die Digitale Bild- und Objektwissenschaft.....	11129
B.DH.02a: Einführung in die Digitale Bild- und Objektwissenschaft.....	11130
B.Inf.1213: Quantencomputing.....	11131
B.Inf.1231: Infrastrukturen für Data Science.....	11132
B.Inf.1236: Machine Learning.....	11134
B.Inf.1237: Deep Learning.....	11135
B.Inf.1240: Visualization.....	11136
B.Inf.1241: Computational Optimal Transport.....	11137
B.Inf.1242: Streaming Algorithms.....	11138
B.Inf.1243: Algorithms for Data Science.....	11139
B.Inf.1244: Data Management for Data Science.....	11140
B.Inf.1246: Software Engineering for Data Science.....	11142
B.Inf.1351.A: Grundlagen der Biomedizin.....	11144
B.Inf.1709: Vertiefung Algorithmen und Datenstrukturen.....	11146
B.Mat.1300: Numerische lineare Algebra.....	11149
B.Mat.1400: Maß- und Wahrscheinlichkeitstheorie.....	11151
B.Mat.2300: Numerische Analysis.....	11153
B.Mat.2310: Optimierung.....	11155
B.Mat.2420: Statistical Data Science.....	11157
B.Phy.5601: Theoretical and Computational Neuroscience I.....	11159
B.Phy.5602: Theoretical and Computational Neuroscience II.....	11160
B.Phy.5605: Computational Neuroscience: Basics.....	11161
B.Phy.5651: Advanced Computational Neuroscience.....	11162
B.Phy.5652: Advanced Computational Neuroscience II.....	11163
B.Phy.5676: Computer Vision and Robotics.....	11164
B.Psy.902: Biologische Psychologie: Neurowissenschaften.....	11166

Table of Contents

M.Agr.0052: Ökologie und Naturschutz.....	11167
M.Agr.0061: Projektpraktikum Naturschutz in der Agrarlandschaft.....	11169
M.Bio.141: Allgemeine und Angewandte Mikrobiologie.....	11171
M.Bio.142: Molekulare Genetik und mikrobielle Zellbiologie.....	11172
M.Bio.144: Zell- und Molekularbiologie von Pflanzen-Mikroben-Interaktionen.....	11173
M.Bio.157: Biochemie und Biophysik - Schlüsselkompetenzmodul.....	11174
M.Bio.310: Systembiologie.....	11175
M.Bio.323: Einführung in die Bayes'sche Inferenz und Informationstheorie.....	11176
M.Bio.344: Neurobiologie 1 (Schlüsselkompetenzmodul).....	11177
M.Bio.373: Visual Psychophysics - From Theory to Experiment.....	11178
M.DH.01: Weiterführende Themen der Digital Humanities.....	11179
M.DH.10: Theorien und Forschungsfragen der Digitalen Sprachanalyse.....	11180
M.DH.11: Theorien und Forschungsfragen der Digitalen Textanalyse.....	11181
M.DH.12: Theorien und Forschungsfragen der Digitalen Literaturanalyse.....	11182
M.DH.13: Theorien und Forschungsfragen der Digitalen Bildanalyse.....	11183
M.DH.14: Theorien und Forschungsfragen der Digitalen Objektanalyse / Materialität.....	11184

NICHT-AMTLICHE FASSUNG

Index by areas of study

I. Master's programme „Applied Data Science”

A total of 120 C have to be successfully completed according to the following regulations.

1. Core Curriculum (49 C)

A total of 49 C have to be successfully completed according to the following regulations.

a. Fundamentals of Data Science

The following six modules of 38 C in total have to be successfully completed.

Provided that students have prior knowledge of the fundamentals of data science, corresponding modules with a total maximum of 38 C are to be replaced by modules with at least the same extent according to No. 2. The mentor decides on this according to principles to be formulated by the examination board. Modules that have already been completed in the Bachelor's programme cannot be taken again.

B.Inf.1231: Infrastructures of Data Science (6 C, 4 SWS).....	11132
B.Inf.1236: Machine Learning (6 C, 4 SWS).....	11134
B.Inf.1237: Deep Learning (6 C, 4 SWS).....	11135
M.Inf.2101: Best Practice Methods of Privacy and Ethics in Data Science (5 C, 2 SWS).....	11246
M.MED.0001: Linear Models and their Mathematical Foundations (9 C, 6 SWS).....	11264
M.WIWI-QMW.0002: Advanced Statistical Inference (Likelihood & Bayes) (6 C, 4 SWS).....	11286

b. Statistical methods of Data Science

One of the following modules of 6 C has to be successfully completed:

M.Inf.2102: Advanced Statistical Learning for Data Science (6 C, 4 SWS).....	11247
M.MED.0020: Analysis of Longitudinal and Time-to-Event Data (6 C, 4 SWS).....	11274
M.MED.0021: Experimental Design and Causal Inference (6 C, 4 SWS).....	11276
M.WIWI-QMW.0001: Generalized Regression (6 C, 4 SWS).....	11284

c. Computer Science methods of Data Science

One of the following modules of 5 C has to be successfully completed:

B.Inf.1243: Algorithms for Data Science (5 C, 4 SWS).....	11139
B.Inf.1244: Data Management for Data Science (5 C, 4 SWS).....	11140
B.Inf.1246: Software Engineering for Data Science (5 C, 3 SWS).....	11142
M.Inf.1139: Privacy-Enhancing Technologies (5 C, 4 SWS).....	11200

M.Inf.1185: Sensor Data Fusion (5 C, 4 SWS).....	11206
--	-------

2. Professionalisation Section (41 C)

A total of at least 41 C have to be successfully completed according to the following regulations. Modules already completed in the Bachelor's programme cannot be considered again; modules completed according to No. 1 will not be considered again.

a. Elective courses Data Science (5 C)

At least one module of 5 C has to be successfully completed from letters aa to dd:

aa. Computer Science

B.Inf.1213: Quantum computing (5 C, 3 SWS).....	11131
B.Inf.1240: Visualization (5 C, 3 SWS).....	11136
B.Inf.1242: Streaming Algorithms (5 C, 3 SWS).....	11138
B.Inf.1243: Algorithms for Data Science (5 C, 4 SWS).....	11139
B.Inf.1244: Data Management for Data Science (5 C, 4 SWS).....	11140
B.Inf.1246: Software Engineering for Data Science (5 C, 3 SWS).....	11142
B.Inf.1709: Advanced Algorithms and Data Structures (5 C, 4 SWS).....	11146
M.Inf.1138: Usable Security and Privacy (5 C, 4 SWS).....	11199
M.Inf.1139: Privacy-Enhancing Technologies (5 C, 4 SWS).....	11200
M.Inf.1141: Semistructured Data and XML (6 C, 4 SWS).....	11201
M.Inf.1142: Semantic Web (6 C, 4 SWS).....	11202
M.Inf.1161: Image Analysis and Image Understanding (6 C, 4 SWS).....	11203
M.Inf.1171: Cloud and Service Computing (5 C, 3 SWS).....	11204
M.Inf.1185: Sensor Data Fusion (5 C, 4 SWS).....	11206
M.Inf.1188: Mobile Robotics (5 C, 4 SWS).....	11209
M.Inf.1191: Privacy in Ubiquitous Computing (5 C, 4 SWS).....	11210
M.Inf.1193: Seminar on Usable Security and Privacy (5 C, 2 SWS).....	11211
M.Inf.1194: Seminar on Privacy in Data Science (5 C, 2 SWS).....	11212
M.Inf.1195: Seminar Human in the Age of Artificial Intelligence (5 C, 2 SWS).....	11213
M.Inf.1213: Algorithmic Learning and Pattern Recognition (6 C, 4 SWS).....	11215
M.Inf.1232: Parallel Computing (6 C, 4 SWS).....	11216
M.Inf.1236: High-Performance Data Analytics (6 C, 4 SWS).....	11219

M.Inf.1268: Information Theory (6 C, 4 SWS).....	11224
M.Inf.1828: Lab Usable Security and Privacy (6 C, 4 SWS).....	11240
M.Inf.2201: Probabilistic Machine Learning (9 C, 6 SWS).....	11249
M.Inf.2202: Deep Learning for Natural Language Processing (6 C, 4 SWS).....	11251

bb. Statistics

M.Bio.323: Introduction to Bayesian Statistics and Information Theory (12 C, 12 SWS)....	11176
M.MED.0003: Event Data Analysis (6 C, 4 SWS).....	11266
M.MED.0011: Nonparametric procedures (6 C, 4 SWS).....	11272
M.MED.0020: Analysis of Longitudinal and Time-to-Event Data (6 C, 4 SWS).....	11274
M.MED.0021: Experimental Design and Causal Inference (6 C, 4 SWS).....	11276
M.WIWI-QMW.0001: Generalized Regression (6 C, 4 SWS).....	11284
M.WIWI-QMW.0009: Introduction to Time Series Analysis (6 C, 4 SWS).....	11288
M.WIWI-QMW.0010: Multivariate Statistics (6 C, 4 SWS).....	11290
M.WIWI-QMW.0012: Multivariate Time Series Analysis (6 C, 4 SWS).....	11291
M.WIWI-QMW.0016: Spatial Statistics (6 C, 4 SWS).....	11293
M.WIWI-QMW.0035: Statistical and Deep Learning (6 C, 4 SWS).....	11296

cc. Mathematics

Modules of the following cycles of the mathematical teaching unit can be completed:

- Optimisation
- Inverse problems
- Image and geometry processing
- Scientific computing/applied mathematics
- Applied and mathematical stochastics
- Statistical modelling and inference
- Multivariate statistics
- Statistical foundations of data science

Additionally, the following modules can be chosen:

B.Inf.1241: Computational Optimal Transport (6 C, 4 SWS).....	11137
B.Mat.1300: Numerical linear algebra (9 C, 6 SWS).....	11149
B.Mat.1400: Measure and probability theory (9 C, 6 SWS).....	11151
B.Mat.2300: Numerical analysis (9 C, 6 SWS).....	11153
B.Mat.2310: Optimisation (9 C, 6 SWS).....	11155
B.Mat.2420: Statistical Data Science (9 C, 6 SWS).....	11157

dd. Practical courses and seminars

M.Inf.1186: Seminar Hot Topics in Data Fusion and Analytics (5 C, 2 SWS).....	11208
M.Inf.1234: Emerging Topics in Advanced Computer Networks (6 C, 4 SWS).....	11218
M.Inf.1237: Seminar Newest Trends in High-Performance Data Analytics (5 C, 2 SWS).....	11221
M.Inf.1238: Scalable Computing Systems and Applications in AI, BigData and HPC (5 C, 3 SWS).....	11222
M.Inf.1244: Seminar on optimal transport (5 C, 2 SWS).....	11223
M.Inf.1806: Seminar and Project Databases (6 C, 2 SWS).....	11236
M.Inf.1808: Practical Course on Parallel Computing (6 C, 4 SWS).....	11237
M.Inf.1822: Practical Course in Data Fusion (6 C, 4 SWS).....	11239
M.Inf.1829: Practical course in High-Performance Computing (6 C, 4 SWS).....	11241
M.Inf.1830: Practical Course FPV Quadcopter - Basics (6 C, 4 SWS).....	11243
M.Inf.2241: Current Topics in Machine Learning (5 C, 2 SWS).....	11254
M.Inf.2242: Journal Club Machine Learning and Computational Neuroscience (5 C, 2 SWS).....	11255
M.Inf.2243: Selected Topics in Data Science (5 C, 3 SWS).....	11256
M.Inf.2244: Seminar Deep Learning in Biology and Medicine (5 C, 2 SWS).....	11257
M.Mat.0731: Advanced practical course in scientific computing (10 C, 4 SWS).....	11278
M.Mat.0741: Advanced practical course in stochastics (10 C, 6 SWS).....	11280
M.WIWI-QMW.0033: Current Topics in Applied Statistics (6 C, 2 SWS).....	11295

b. Application domain (18 C)

In one of the following application domains modules of at least 18 C in total have to be successfully completed according to the regulations under No. II to VI: "Computational Neuroscience", "Bioinformatics", "Medical Data Science", "Digital Humanities", "Computational Sustainability".

c. Key competencies (18 C)

A total of at least 18 C have to be successfully completed according to the following regulations.

aa. Job-related competencies

One of the following modules of 12 C has to be successfully completed:

M.Inf.2801: Research Lab Rotation (12 C, 1 SWS).....	11260
M.Inf.2802: Industry internship (12 C, 1 SWS).....	11261

bb. Interdisciplinary competencies

Modules amounting to at least 6 C (maximum 9 C) from the university-wide module directory for key competencies or the examination regulations for study programmes offered by the Central Institution for Languages and Key Qualifications (ZESS) must be taken. The examination board decides on further selectable modules, which are to be announced in an appropriate manner.

d. Prior knowledge in the Professionalisation Section

Students who have prior knowledge which largely corresponds to obligatory modules according to letter b are not required to complete these modules; in the case of an application domain, they are to be replaced by other modules of the application domain of comparable extent. The mentor decides on this according to principles to be formulated by the examination board. Modules that have already been completed in the Bachelor's programme cannot be taken again.

3. Further modules

Further modules according to No. 1 and 2 have to be successfully completed until at least 90 C have been earned in the core curriculum and the professionalisation section combined.

4. Master's thesis

The following module of 30 C has to be successfully completed:

M.Inf.2901: Master's Thesis (30 C, 2 SWS).....	11262
--	-------

II. Application domain „Computational Neuroscience“

A total of at least 18 C have to be successfully completed according to the following regulations.

1. Fundamentals

The following three modules of 9 C in total have to be successfully completed:

B.Phy.5605: Computational Neuroscience: Basics (3 C, 2 SWS).....	11161
M.Inf.2501: Challenges and Perspectives in Neural Data Science (3 C, 2 SWS).....	11258
SK.Bio-NF.7001: Neurobiology (3 C, 2 SWS).....	11297

2. Elective courses

A total of at least 9 C have to be successfully completed, among them at least one seminar.

B.Phy.5601: Theoretical and Computational Neuroscience I (3 C, 2 SWS).....	11159
B.Phy.5602: Theoretical and Computational Neuroscience II (3 C, 2 SWS).....	11160
B.Phy.5651: Advanced Computational Neuroscience (3 C, 2 SWS).....	11162
B.Phy.5652: Advanced Computational Neuroscience II (3 C, 2 SWS).....	11163
B.Phy.5676: Computer Vision and Robotics (9 C, 6 SWS).....	11164
B.Psy.902: Biological Psychology: Neurosciences (8 C, 4 SWS).....	11166

M.Bio.373: Visual psychophysics - from theory to experiment (3 C, 2 SWS).....	11178
M.Inf.2242: Journal Club Machine Learning and Computational Neuroscience (5 C, 2 SWS).....	11255
M.Inf.2541: Current Topics in Computational Neuroscience (5 C, 2 SWS).....	11259
M.Phy.5601: Seminar Computational Neuroscience/Neuro-informatics (4 C, 2 SWS).....	11282
M.Psy.901: From Vision to Action (6 C, 4 SWS).....	11283
SK.Bio.357: Biological psychology III (3 C, 2 SWS).....	11299

III. Application domain „Bioinformatics“

A total of at least 18 C have to be successfully completed according to the following regulations.

1. Biological fundamentals

Two of the following modules of at least 6 C in total have to be successfully completed:

M.Bio.141: General and applied microbiology (3 C, 3 SWS).....	11171
M.Bio.142: Molecular genetics and microbial cell biology (3 C, 3 SWS).....	11172
M.Bio.144: Cellular and molecular biology of plant-microbe interactions (3 C, 3 SWS).....	11173
M.Bio.157: Biochemistry and biophysics (3 C, 3 SWS).....	11174
M.Bio.344: Neurobiology 1 (key competence module) (3 C, 2 SWS).....	11177

2. Elective courses Bioinformatics

A total of at least 12 C have to be successfully completed:

M.Bio.310: Systems biology (12 C, 14 SWS).....	11175
M.Inf.1211: Probabilistic Data Models and Applications (6 C, 4 SWS).....	11214
M.Inf.1501: Data Mining in Bioinformatics (6 C, 4 SWS).....	11233
M.Inf.1503: Seminar Bioinformatics (5 C, 2 SWS).....	11234
M.Inf.1504: Algorithms in Bioinformatics II (6 C, 4 SWS).....	11235
M.Inf.2244: Seminar Deep Learning in Biology and Medicine (5 C, 2 SWS).....	11257

IV. Application domain „Medical Data Science“

A total of at least 18 C have to be successfully completed according to the following regulations.

1. Fundamentals of Medical Data Science

At least one module of at least 6 C in total has to be successfully completed:

B.Bio.113: Applied bioinformatics (10 C, 7 SWS).....	11126
B.Inf.1351.A: Fundamentals of Biomedicine (6 C, 4 SWS).....	11144

M.MED.0006: Genetic Epidemiology (6 C, 4 SWS).....	11270
--	-------

2. Elective courses Medical Data Science

A total of at least 6 C have to be successfully completed:

M.Bio.310: Systems biology (12 C, 14 SWS).....	11175
M.Inf.1303: Imaging and Visualization (6 C, 4 SWS).....	11225
M.Inf.1304: E-Health (6 C, 4 SWS).....	11227
M.Inf.1307: Current Topics in Medical Informatics (6 C, 4 SWS).....	11229
M.Inf.1308: Journal Club (3 C, 2 SWS).....	11230
M.Inf.1351: Work Methods in Health Research (5 C, 3 SWS).....	11231
M.Inf.356-1: Personalized Medicine (3 C, 2 SWS).....	11263
M.MED.0003: Event Data Analysis (6 C, 4 SWS).....	11266
M.MED.0004: Clinical Trials (6 C, 4 SWS).....	11268

V. Application domain „Digital Humanities“

A total of at least 18 C have to be successfully completed according to the following regulations.

1. Fundamental modules

The modules “Introduction to Computational Text and Language Analysis” and „Introduction to Digital Image and Artefact Science“ are recommended if the competencies have not already been acquired. Only one of the modules B.DH.01 and B.DH.01a as well as only one of the modules B.DH.02 and B.DH.02a can be taken. The module M.DH.01 is recommended.

B.DH.01: Introduction to Computational Text and Language Analysis (6 C, 4 SWS).....	11127
B.DH.01a: Introduction to Computational Text and Language Analysis (6 C, 4 SWS).....	11128
B.DH.02: Introduction to Digital Visual Culture (6 C, 4 SWS).....	11129
B.DH.02a: Introduction to Digital Image and Artefact Science (6 C, 4 SWS).....	11130
M.DH.01: Advanced Topics in Digital Humanities (6 C, 4 SWS).....	11179

2. Advanced modules

Additionally, the following modules can be chosen:

M.DH.10: Theories and Research Questions in Digital Language Analysis (9 C, 4 SWS).....	11180
M.DH.11: Theories and Research Questions in Digital Text Analysis (9 C, 4 SWS).....	11181
M.DH.12: Theories and Research Questions in Digital Literature Analysis (9 C, 4 SWS).....	11182
M.DH.13: Theories and Research Questions in Digital Image Analysis (9 C, 4 SWS).....	11183
M.DH.14: Theories and Research Questions in Digital Object Analysis / Materiality (9 C, 4 SWS)	11184

M.DH.15: Theories and Research Questions in Digital Spatial Analysis (9 C, 4 SWS).....	11185
M.DH.16: Digital Analysis of Historical Contexts (9 C, 4 SWS).....	11186

VI. Application domain „Computational Sustainability“

A total of at least 18 C have to be successfully completed:

M.Agr.0052: Ecology and Nature Conservation (6 C, 6 SWS).....	11167
M.Agr.0061: Practical Course Nature Conservation in Agricultural Landscapes (6 C, 4 SWS).....	11169
M.FES.111: Introduction to Ecological Modelling (6 C, 4 SWS).....	11187
M.FES.114: Ecosystem - Atmosphere Processes (6 C, 4 SWS).....	11188
M.FES.122: Ecological Simulation Modelling (6 C, 4 SWS).....	11189
M.FES.124: Modern Concepts and Methods in Macroecology and Biogeography (6 C, 4 SWS).....	11190
M.FES.223: Experimental Bioclimatology (6 C, 4 SWS).....	11191
M.FES.231: Project: Ecosystem Sciences (12 C, 2 SWS).....	11192
M.FES.712: Bioclimatology and global change (6 C, 4 SWS).....	11193
M.FES.726: Ecological Modelling with C++ (6 C, 4 SWS).....	11194
M.Geg.02: Resource Utilisation Problems (6 C, 4 SWS).....	11195
M.Geg.17: Landscape Ecology (6 C, 4 SWS).....	11197

VII. Connector Courses

M.Inf.2001: Python for Data Scientists (3 C, 2 SWS).....	11245
--	-------

VIII. Forms of examination

If module descriptions are published in English in this module directory, the forms of examination stated correspond to the following German translations:

- Oral exam = mündliche Prüfung [§ 15 Abs. 8 APO]
- Written exam = Klausur [§ 15 Abs. 9 APO]
- Term paper = Hausarbeit [§ 15 Abs. 11 APO]
- Presentation = Präsentation [§ 15 Abs. 12 APO]
- Presentation with written elaboration/report = Präsentation mit schriftlicher Ausarbeitung [§ 15 Abs. 12 APO]
- Practical examination = praktische Prüfung [§ 15 Abs. 13 APO]
- Internship report = Praktikumsbericht [§ 10 Abs. 2 PStO]

APO = Allgemeinen Prüfungsordnung für Bachelor- und Master-Studiengänge sowie sonstige Studienangebote an der Universität Göttingen

PStO = Prüfungs- und Studienordnung für den konsekutiven Master-Studiengang "Angewandte Data Science"

Georg-August-Universität Göttingen Module B.Bio.113: Applied bioinformatics	10 C 7 WLH
Learning outcome, core skills: After passing the module the students will understand the structure of most databases in bioscientific research and be able to critically assess their content. They will learn to structure biological data and transfer the data to a database scheme. Furthermore the students learn the application of bioinformatical methods in particular on sequence data, biological networks and expression data.	Workload: Attendance time: 98 h Self-study time: 202 h
Course: Einführung in die angewandte Bioinformatik (Lecture)	4 WLH
Examination: Written examination (90 minutes) Examination prerequisites: regular participation in the practical training and successful completion of three exercises Examination requirements: The students should know suitable sources of biomedical information available in the internet. They should be able to design and explain simple database schemes. The students should be familiar with measurements for critical assessment of bioinformatical methods; different methods for sequence comparison; reconstruction of phylogenetic trees; application of concepts from information theory on the analysis of sequence data. The students should be able to describe basic characteristics and graph theoretical representations of biological networks and apply these concepts to data analysis.	10 C
Course: Internet-basierte Bioinformatik (Exercise)	3 WLH
Admission requirements: BSc Biology: at least 40 C from the first study period	Recommended previous knowledge: none
Language: German	Person responsible for module: Prof. Dr. Tim Beißbarth
Course frequency: each winter semester	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester: 3 - 5
Maximum number of students: 100	

Georg-August-Universität Göttingen Module B.DH.01: Introduction to Computational Text and Language Analysis		6 C 4 WLH
Learning outcome, core skills: Die Studierenden <ul style="list-style-type: none"> haben einen Überblick über wesentliche Gegenstände und Problemstellungen der Computerphilologie und Computerlinguistik; können Folgen und Perspektiven der digitalen Text- und Sprachanalyse einschätzen; kennen zentrale Fragen der Digitalen Text- und Sprachwissenschaften, relevante Case Studies und die wichtigsten Werkzeuge zum Erstellen, Verwalten und Verarbeiten digitaler Daten (z.B. Werkzeuge zur linguistischen Analyse, OCR-Systeme, Korpusverwaltungstools). 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Einführung in die digitale Text- und Sprachanalyse (Lecture)		2 WLH
Examination: Written examination (90 minutes), not graded Examination prerequisites: regelmäßige Teilnahme am Tutorium sowie Ausarbeitung einer praktischen Anwendung im Umfang von max. 5 Seiten. Examination requirements: Die Studierenden weisen im Bereich der Text- und Sprachwissenschaft Kenntnisse spezifisch geisteswissenschaftlicher Fragestellungen, Vorgehensweisen und Forschungsergebnisse auf Grundlage digitaler Datenverarbeitung nach sowie die Fähigkeit, Methoden und Theoriebildungen in den Digital Humanities nachzuvollziehen und in Ansätzen zu reflektieren.		6 C
Course: Tutorium (Tutorial)		2 WLH
Admission requirements: none	Recommended previous knowledge: none	
Language: German, English	Person responsible for module: Prof. Dr. Caroline Sporleder	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 1 - 2	
Maximum number of students: 25		
Additional notes and regulations: Das Modul B.DH.01 kann nicht gemeinsam mit dem Modul B.DH.01a belegt werden.		

Georg-August-Universität Göttingen		6 C 4 WLH
Module B.DH.01a: Introduction to Computational Text and Language Analysis		
Learning outcome, core skills: The students <ul style="list-style-type: none"> • have an overview of the essential objects and problems of computational philology and computational linguistics; • are able to assess the consequences and perspectives of digital text and language analysis; • know central questions of digital text and linguistics, relevant case studies and the most important tools for creating, managing and processing digital data (e.g. tools for linguistic analysis, OCR systems, corpus management tools). 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Self-learning units (Video tutorials, ILIAS course, Exercises)		4 WLH
Examination: Written examination (90 minutes), not graded Examination prerequisites: Successful participation in the ILIAS course Examination requirements: In the field of text and linguistics, students demonstrate knowledge of specific humanities questions, procedures and research results on the basis of digital data processing as well as the ability to comprehend and reflect on methods and theories in the digital humanities.		6 C
Admission requirements: none	Recommended previous knowledge: none	
Language: German, English	Person responsible for module: Prof. Dr. Caroline Sporleder Prof. Dr. Jörg Wesche	
Course frequency: each semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 1	
Additional notes and regulations: The module B.DH.01a cannot be taken together with the module B.DH.01.		

Georg-August-Universität Göttingen Module B.DH.02: Introduction to Digital Visual Culture		6 C 4 WLH
Learning outcome, core skills: Die Studierenden <ul style="list-style-type: none"> • haben einen Überblick über wesentliche Gegenstände und Problemstellungen der Digitalen Bild- und Objektwissenschaft; • können Folgen und Perspektiven der Digitalen Bild- und Objektanalyse einschätzen; • kennen zentrale Fragen der Digitalen Bild- und Objektwissenschaft, relevante Case Studies und die wichtigsten Werkzeuge zum Erstellen, Verwalten und Verarbeiten digitaler Daten (z.B. Korpusbildung, Bildverarbeitung, 3D Erfassung, Bild- und Objektdatenbanken, quantifizierende Methoden, Virtual Heritage). 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Einführung in die Digitale Bild- und Objektwissenschaft (Lecture)		2 WLH
Examination: Written examination (90 minutes), not graded Examination prerequisites: regelmäßige Teilnahme am Tutorium sowie Ausarbeitung einer praktischen Anwendung im Umfang von max. 5 Seiten. Examination requirements: Die Studierenden weisen im Bereich der Bild- und Objektwissenschaften Kenntnisse spezifisch geisteswissenschaftlicher Fragestellungen, Vorgehensweisen und Forschungsergebnisse auf Grundlage digitaler Datenverarbeitung nach sowie die Fähigkeit, Methoden und Theoriebildungen in den Digital Humanities nachzuvollziehen und in Ansätzen zu reflektieren.		6 C
Course: Tutorium (Tutorial)		2 WLH
Admission requirements: none	Recommended previous knowledge: none	
Language: German, English	Person responsible for module: Prof. Dr. Martin Langner	
Course frequency: each summer semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 1 - 2	
Maximum number of students: 25		
Additional notes and regulations: Das Modul B.DH.02 kann nicht gemeinsam mit dem Modul B.DH.02a belegt werden.		

Georg-August-Universität Göttingen		6 C 4 WLH
Module B.DH.02a: Introduction to Digital Image and Artefact Science		
Learning outcome, core skills: The students <ul style="list-style-type: none"> • have an overview of the essential objects and problems of digital image and object science; • are able to assess the consequences and perspectives of digital image and object analysis; • know central questions of digital image and object science, relevant case studies and the most important tools for creating, managing and processing digital data (e.g. corpus formation, image processing, 3D acquisition, image and object databases, quantifying methods, virtual heritage). 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Self-learning units (Video tutorials, ILIAS course, Exercises)		4 WLH
Examination: Written examination (90 minutes), not graded Examination prerequisites: Successful participation in the ILIAS course Examination requirements: In the field of image and artefact sciences, students demonstrate knowledge of specific humanities questions, procedures and research results based on digital data processing, as well as the ability to comprehend and reflect on methods and theories in the Digital Humanities.		6 C
Admission requirements: none	Recommended previous knowledge: none	
Language: German, English	Person responsible for module: Prof. Dr. Martin Langner	
Course frequency: each semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 1	
Additional notes and regulations: The module B.DH.02a cannot be taken together with the module B.DH.02.		

Georg-August-Universität Göttingen		5 C
Module B.Inf.1213: Quantum computing		3 WLH
Learning outcome, core skills: Es werden die Grundlage des Quantencomputings gelegt, so dass die Teilnehmerinnen und Teilnehmer im Anschluss dessen grundlegende Prinzipien im Vergleich zum klassischen Rechnen verstanden haben. Dies geschieht vermöge der Vermittlung grundlegender Algorithmen, wie Deutschs Algorithmus, Grovers Algorithmus, der Quanten-Fouriertransformation und Shors Algorithmus. Das geht nicht ohne ein Verständnis von Quantenregistern und Quantenschaltkreisen.		Workload: Attendance time: 42 h Self-study time: 108 h
Course: Quantencomputing (Lecture, Exercise)		3 WLH
Examination: Oral examination Mündliche Prüfung oder mündliche online Prüfung (ca. 20 min) (approx. 20 minutes) Examination requirements: Quantenregister; Quantenschaltkreise; Deutschs Algorithmus; Grovers Algorithmus; Quanten-Fouriertransformation; Shors Algorithmus; Vergleich Quantencomputing und klassisches Rechnen.		5 C
Admission requirements: Grundlagen der Analysis, der Lineare Algebra und der Theoretischen Informatik	Recommended previous knowledge: none	
Language: German	Person responsible for module: Prof. Dr. Stephan Waack	
Course frequency: unregelmäßig	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 3 - 6	
Maximum number of students: 50		

<p>Georg-August-Universität Göttingen Module B.Inf.1231: Infrastructures of Data Science</p>	<p>6 C 4 WLH</p>
<p>Learning outcome, core skills: Upon completion the course, students</p> <ul style="list-style-type: none"> • understand the basic functions of data science infrastructures and their significance. • understand basic data types and their specifics. • understand the most important technical infrastructures for storing and processing data locally and in the cloud as well as their advantages and disadvantages in relation to data science applications. • can apply the concept of the data lake to basic data science problems. • are able to apply the different steps of data pre-processing to selected data sets. • can identify the characteristics of time series and graph data and are able to recall the functions of DBMSs designed for their processing. • can present the basic tasks of data analysis platforms and can describe them using examples. • can apply methods and tools for the presentation and visualisation of data. • can model basic data science workflows and are able to transfer their knowledge to basic data science projects. 	<p>Workload: Attendance time: 56 h Self-study time: 124 h</p>
<p>Course: Infrastructures of Data Science (Lecture, Exercise) <i>Contents:</i></p> <ul style="list-style-type: none"> • Data types and their characteristics • Common functions of data science infrastructures • Storage, compute, and cloud infrastructures for data science • Concept of a data lake • Data pre-processing methods and selected tools • Time series and graph data, the respective DBMS, and query languages • Data analytics platforms • Data presentation and visualization • Data science workflows and selected infrastructure components 	<p>4 WLH</p>
<p>Examination: In-class, written exam (90 min) or oral exam (approx. 30 min.) Examination prerequisites: Students complete 50% of the homework exercises. Examination requirements: Through the examination students demonstrate that they are able to describe basic functions of (cloud-based) data science infrastructures as well as to specify and identify basic data types. Students can also prove their understanding of data lakes and can apply their knowledge of MapReduce and Hadoop in that particular context. They can analyse basic data pre-processing problems and sketch common solutions. Student can show that they understand time series and graph data as well as the corresponding DBMS and that they can present common tasks of data analysis platforms. Through the examination, students also demonstrate their ability to select appropriate methods for visualising data and show that they are able to create basic data science workflows.</p>	<p>6 C</p>

Admission requirements: none	Recommended previous knowledge: Python and basic database knowledge (recommended, not mandatory)
Language: English	Person responsible for module: Hon.-Prof. Dr. Philipp Wieder
Course frequency: each summer semester	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester: Bachelor: 3 - 6; Master: 1 - 2
Maximum number of students: 50	

NICHT-AMTLICHE FASSUNG

Georg-August-Universität Göttingen Module B.Inf.1236: Machine Learning		6 C 4 WLH
Learning outcome, core skills: Students <ul style="list-style-type: none"> • learn concepts and techniques of machine learning and understand their advantages and disadvantages compared with alternative approaches • learn techniques of supervised learning for classification and regression • learn techniques of unsupervised learning for density estimation, dimensionality reduction and clustering • implement machine learning algorithms like linear regression, logistic regression, kernel methods, tree-based methods, neural networks, principal component analysis, k-means and Gaussian mixture models • solve practical data science problems using machine learning methods 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Machine Learning (Lecture) Bishop: Pattern recognition and machine learning. https://cs.ugoe.de/prml		2 WLH
Examination: Written examination (90 minutes) Examination prerequisites: B.Inf.1236.Ex: At least 50% of homework exercises solved and N-1 attempts presented to tutors Examination requirements: Knowledge of the working principles, advantages and disadvantages of the machine learning methods covered in the lecture		6 C
Course: Machine Learning - Exercise (Exercise) <i>Contents:</i> Students present their solutions of the homework exercises to tutors and discuss them with their tutors.		2 WLH
Admission requirements: none	Recommended previous knowledge: Knowledge of basic linear algebra and probability English language proficiency at level B2 (CEFR)	
Language: English	Person responsible for module: Prof. Dr. Alexander Ecker	
Course frequency: each summer semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 4	
Maximum number of students: 100		

Georg-August-Universität Göttingen		6 C
Module B.Inf.1237: Deep Learning		4 WLH
Learning outcome, core skills: Students <ul style="list-style-type: none"> • learn concepts and techniques of deep learning and understand their advantages and disadvantages compared to alternative approaches • learn to solve practical data science problems using deep learning • implement deep learning techniques like multi-layer perceptrons, convolutional neural networks and other modern deep learning architectures • learn techniques for optimization and regularization of deep neural networks • learn applications of deep neural networks for computer vision tasks such as segmentation and object detection 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Deep Learning for Computer Vision (Lecture) Goodfellow, Bengio, Courville: Deep Learning. https://www.deeplearningbook.org Bishop: Pattern Recognition and Machine Learning. https://cs.ugoe.de/prml		2 WLH
Examination: Written examination (90 minutes) Examination prerequisites: B.Inf.1237.Ex: At least 50% of homework exercises solved and N-1 attempts presented to tutors Examination requirements: Knowledge of basic deep learning techniques, their advantages and disadvantages and approaches to optimization and regularization. Ability to implement these techniques.		6 C
Course: Deep Learning for Computer Vision - Exercise (Exercise) <i>Contents:</i> Students present their solutions of the homework exercises to tutors and discuss them with their tutors.		2 WLH
Admission requirements: none	Recommended previous knowledge: Basic knowledge of linear algebra and probability Completion of B.Inf.1236 Machine Learning or equivalent	
Language: English	Person responsible for module: Prof. Dr. Constantin Pape Prof. Dr. Alexander Ecker	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 5	
Maximum number of students: 100		

Georg-August-Universität Göttingen Module B.Inf.1240: Visualization		5 C 3 WLH
Learning outcome, core skills: Knowledge of <ul style="list-style-type: none"> • the potentials and limitations of data visualization • the fundamentals of visual perception and cognition and their implications for data visualization. Students can apply these to the design of visualizations and detect manipulative design choices • a broad variety of techniques for visual representation of data, including abstract and high-dimensional data. Students can select appropriate methods on new problems • integration of visualization into the data analysis process, algorithmic generation and interactive methods 		Workload: Attendance time: 42 h Self-study time: 108 h
Course: Visualization (Lecture, Exercise)		3 WLH
Examination: Practical project (2-3 weeks) with presentation and questions during oral exam in groups (approx. 20 minutes per examinee). Examination prerequisites: At least 50% of homework exercises solved. Examination requirements: Knowledge of potentials and limitations of data visualization, fundamentals of visual perception and their implications for good design choices, techniques for visual representation and how to use them.		5 C
Admission requirements: none	Recommended previous knowledge: Foundations of linear algebra and analysis (e.g. B.Mat.0801 and B.Mat.0802) and programming skills (e.g. B.Inf.1842).	
Language: English	Person responsible for module: Prof. Dr. Bernhard Schmitzer	
Course frequency: once a year	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 3 - 6	
Maximum number of students: 50		

Georg-August-Universität Göttingen		6 C
Module B.Inf.1241: Computational Optimal Transport		4 WLH
Learning outcome, core skills: Knowledge of <ul style="list-style-type: none"> the fundamental notions of optimal transport, and its strengths and limitations as a data analysis tool the discrete Kantorovich formulation, its convex duality, and Wasserstein distances classical numerical algorithms, entropic regularization, and their scopes of applicability examples for data analysis applications. Students can transfer these to new potential applications 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Computational Optimal Transport (Lecture, Exercise)		4 WLH
Examination: Written exam (90 minutes) or oral exam (approx. 20 minutes) Examination prerequisites: At least 50% of homework exercises solved. Examination requirements: Knowledge of Kantorovich duality, Wasserstein distances, standard algorithms and implications for data analysis applications.		6 C
Admission requirements: none	Recommended previous knowledge: Foundations of linear algebra and analysis (e.g. B.Mat.0801 and B.Mat.0802) and programming skills (e.g. B.Inf.1842).	
Language: English	Person responsible for module: Prof. Dr. Bernhard Schmitzer	
Course frequency: once a year	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 4 - 6	
Maximum number of students: 50		

Georg-August-Universität Göttingen		5 C
Module B.Inf.1242: Streaming Algorithms		3 WLH
<p>Learning outcome, core skills: After the successful completion of the module, the students should have a good understanding of the data stream model and its applications in practical scenarios (related, for instance, to the processing of big-data). We will present a series of algorithmic problems and their solutions in the streaming model, such as: finding frequent items, counting distinct elements, sketching, analysis of geometric streams, graph streams, text streams, communication complexity and lower bounds. On each specific topic, the lecture will start from a relatively low level (and cover also basic algorithms for arrays, graphs, strings, etc.).</p> <p>Basic references are the lecture Data Stream Algorithms by Amit Chakrabarti from University of Dartmouth (USA), and the Data Stream Algorithms Lecture Notes from a series of lectures by S. Muthu Muthukrishnan from the 2009 McGill (Barbados) Workshop on Computational Complexity (both available online).</p>		<p>Workload: Attendance time: 42 h Self-study time: 108 h</p>
Course: Streaming Algorithms (Exercise)		1 WLH
Course: Streaming Algorithms (Lecture)		2 WLH
Examination: Oral examination (approx. 30 minutes)		5 C
<p>Examination requirements: Oral presentation of a theoretical subject from the lecture and a sketch solution to an algorithmic problem related to the covered topics.</p>		
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Florin Manea	
Course frequency: each summer semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: three times	Recommended semester: Bachelor: 5 - 6; Master: 1 - 4	
Maximum number of students: 20		

Georg-August-Universität Göttingen		5 C 4 WLH
Module B.Inf.1243: Algorithms for Data Science		
Learning outcome, core skills: After the successful completion of the module, the students should have a good understanding of fundamental algorithmic-approaches and -tools used in the area of data science. This lecture will approach topics related to: processing of fundamental data types and structures, such as numeric and textual data, graphs, spatial data, etc.; measuring the similarity of data; clustering; pattern matching, recognition, and mining; etc. The lecture will start from a relatively low level (and cover also basic algorithms for graphs, strings, etc.). The lecture will be loosely based on the two following two textbooks. Avrim Blum, John Hopcroft, and Ravi Kannan. Foundations of Data Science, 2018. URL: https://www.cs.cornell.edu/jeh/book.pdf . Charu C. Aggarwal. Data Mining: The Textbook, Springer, May 2015		Workload: Attendance time: 56 h Self-study time: 94 h
Course: Algorithms for Data Science (Exercise)		2 WLH
Course: Algorithms for Data Science (Lecture)		2 WLH
Examination: Oral Exam (approx. 30 min.) or Written Exam (120 min.)		5 C
Examination requirements: Oral presentation of a theoretical subject from the lecture and a sketch solution to an algorithmic problem related to the covered topics.		
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Florin Manea	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: three times	Recommended semester: Bachelor: 5 - 6; Master: 1 - 4	
Maximum number of students: 50		

<p>Georg-August-Universität Göttingen</p> <p>Module B.Inf.1244: Data Management for Data Science</p>	<p>5 C 4 WLH</p>
<p>Learning outcome, core skills:</p> <p>The module provides the fundamental conceptual, systemic and application-related aspects of the sustainable utilization of data from its creation and publication to its sustainable storage. Organized handling of data includes the processes of archiving and re-using data. This covers the strategic planning of research projects (research data management), the management of the technical foundations and the recording, organization, and linking of metadata.</p> <p>The participants will learn approaches to handle big data, including all facets of heterogenous or fast streaming data. We will also work on the concepts of (web) APIs in order to empower the participants to collect and combine their own data sets. The latter requires an understanding of standard processes such as Extract-Transform-Load (ETL). Data integration and interoperability of different data sources is the central challenge. The learned concepts will be tested and applied using advanced solutions. We will investigate the current market of data management tools, warehouse solutions or data processing platforms.</p> <p>The students develop the ability to think in systems and processes. The students are able to transfer their acquired knowledge and skills for problem solving to new areas of responsibility, to work together in groups and to work on new issues together.</p>	<p>Workload:</p> <p>Attendance time: 56 h Self-study time: 94 h</p>
<p>Course: Data Management for Data Science (Lecture, Exercise)</p> <p><i>Contents:</i></p> <ul style="list-style-type: none"> • Data management processes in the context of the data life cycle • Tools for data management • Provision of data for data science processes • Data quality and data security • Data handling in the context of IoT • ETL/ELT processes • Stream & batch processing • Read-only-data structures • Data Lakes vs Data Warehouse • Event-driven data architectures <p><i>Course frequency:</i> each winter semester</p>	<p>4 WLH</p>
<p>Examination: Written examination (120 minutes)</p> <p>Examination requirements:</p> <ul style="list-style-type: none"> • Describing the data lifecycle • Understanding different approaches for data archiving • Explaining the structure, functionality and use of practice-relevant data management, storage and archiving systems • Understanding the ETL/ELT processes for data handling • Describing the concepts of data warehousing and data lakes • Describing the concepts and challenges for Big Data and data at scale 	<p>5 C</p>

- Understanding the read only data store architecture

Admission requirements: none	Recommended previous knowledge: none
Language: English	Person responsible for module: Dr. Sven Bingert
Course frequency: each summer semester	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester: Bachelor: 5 - 6; Master: 1 - 4
Maximum number of students: not limited	

NICHT-AMTLICHE FASSUNG

<p>Georg-August-Universität Göttingen Module B.Inf.1246: Software Engineering for Data Science</p>	<p>5 C 3 WLH</p>
<p>Learning outcome, core skills: The students acquire the following competences in the areas of software engineering and engineering AI-enabled systems:</p> <p>Part I: Software Engineering:</p> <p>The students</p> <ul style="list-style-type: none"> • know definition and tasks of software engineering • know what a software project is and which persons and roles are involved in software projects. • know and can assess different software engineering process models. The assessment is based on purposes as well as advantages and disadvantages of the models. • know the principles of the development phases requirements engineering, design, implementation and quality assurance. • can assess and apply basic techniques for requirements engineering, design and quality assurance. <p>Part II: Engineering AI-Enabled Systems</p> <p>The students</p> <ul style="list-style-type: none"> • know principles and can assess methods of engineering processes for AI-enabled systems. • know, assess and can apply engineering methods for engineering AI-enabled systems. Engineering methods may cover requirements engineering, design, architecture and operations. • know and can assess the principles of responsible AI engineering. This includes knowledge about the aspects provenance, versioning, reproducibility, safety, security and privacy, fairness, interpretability and explainability, as well as transparency and trust. 	<p>Workload: Attendance time: 42 h Self-study time: 108 h</p>
<p>Course: Software Engineering for Data Science (Lecture, Exercise) <i>Contents:</i> The lecture will cover topics from the following materials:</p> <ul style="list-style-type: none"> • Ian Sommerville. 2015. Software Engineering, Global Edition. Pearson Education. • Christian Kästner, Eunsuk Kang. 2020. Teaching software engineering for AI-enabled systems. CSE-SEET '20: Proceedings of the ACM/IEEE 42nd International Conference on Software Engineering: Software Engineering Education and Training. • Geoff Hulten. 2019. Building Intelligent Systems: A Guide to Machine Learning, Engineering. Apress. • Jeff Smith. 2018. Machine Learning Systems: Designs that Scale. Manning Publications Co. 	<p>3 WLH</p>
<p>Examination: Written Exam (90 min.) or Oral Exam (approx. 20 min.)</p>	<p>5 C</p>

Examination prerequisites: Develop and present the solution of one exercise (presentation and report).		
Examination requirements: Software engineering definition, software projects, software processes, requirements engineering, design, implementation, quality assurance, engineering processes for AI-enabled systems, responsible AI engineering.		
Admission requirements: none	Recommended previous knowledge: B.Inf.1101, B.Inf.1841	
Language: English	Person responsible for module: Prof. Dr. Jens Grabowski	
Course frequency: not specified	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: Bachelor: 5 - 6; Master: 1 - 4	

<p>Georg-August-Universität Göttingen Module B.Inf.1351.A: Fundamentals of Biomedicine</p>	<p>6 C 4 WLH</p>
<p>Learning outcome, core skills: Die Studierenden</p> <ul style="list-style-type: none"> • können grundlegende Themenfelder der Biomedizin beschreiben, voneinander abgrenzen und deren Bedeutung für die biomedizinische Forschung, Diagnostik und Therapie erläutern. • können die für das jeweilige Themenfeld zentralen Begriffe nennen, definieren und anwenden. • können die Bedeutung und Rolle der Medizininformatik für erfolgreiche biomedizinische Forschung beschreiben und anhand aktueller Forschungsprojekte und Publikationen exemplarisch erläutern. • identifizieren interdisziplinäre Schnittstellen und können die Unterschiede und das Zusammenwirken von Biologie, Medizin und Informatik anhand von Anwendungsbeispielen beschreiben. 	<p>Workload: Attendance time: 56 h Self-study time: 124 h</p>
<p>Course: Grundlagen der Biomedizin I (Lecture) <i>Contents:</i> Biologie der Zelle, Bakterien, Viren, Genetik/Genomik, DNA/RNA/Phänotyp, Mutationen, Genexpressionsanalyse, genetisch bedingte Krankheiten, Gentherapie, Biobanken. Die Inhalte werden aktuellen Entwicklungen angepasst. Literaturempfehlungen werden zu Beginn des jeweiligen Semesters ausgegeben. <i>Course frequency:</i> each winter semester</p>

NICHT-AMTLICHE FASSUNG

<p>Georg-August-Universität Göttingen Module B.Inf.1709: Advanced Algorithms and Data Structures</p>	<p>5 C 4 WLH</p>
<p>Learning outcome, core skills: Die Studierenden haben vertiefte Kenntnisse und Kompetenzen auf einem Gebiet aus dem Bereich Algorithmen und Datenstrukturen erworben. Beispiele für solche Gebiete sind Algorithms on Sequences und Advanced Topics on Algorithms.</p>	<p>Workload: Attendance time: 56 h Self-study time: 94 h</p>
<p>Course: Algorithms on Sequences (Lecture, Exercise) <i>Contents:</i> This course is an introduction into the theory of stringology, or algorithms on sequences of symbols (also called words or strings). Our main intention is to present a series of basic algorithmic and combinatorial results, which can be used to develop efficient word-processing tools. While the emphasis of the course is on the theoretical side of stringology, we also present a series of applications of the presented concepts in areas like data-compression or computational biology.</p> <p>We expect that the participants to this course will gain an understanding of classical string-processing tools. They are supposed to understand and be able to use in various situations: classical text algorithms (e.g., pattern matching algorithms, edit distance), classical text indexing data structures (e.g., suffix arrays / trees), and classical combinatorial results that are useful in this context (e.g., periodicity lemmas).</p> <p>The main topics our course will cover are: basic combinatorics on words, pattern matching algorithms, data structures for text indexing (suffix arrays, suffix trees), text compression (Huffman encoding, Lempel-Ziv method), detection of regularities in words, algorithms for words with don't care symbols (partial words), word distance algorithms, longest common subsequence algorithms, approximate pattern matching. The presentation of each theoretical topic from the above will be accompanied by a brief discussion on its possible applications.</p> <p>Literature</p> <ul style="list-style-type: none"> • T.H. Cormen, C.E. Leiserson, R.L. Rivest, C. Stein: Introduction to Algorithms (3rd Edition), MIT Press, 2009. • M. Crochemore, C. Hancart, T. Lecroq: Algorithms on Strings, Cambridge University Press, 2007. • M. Crochemore, W. Rytter: Jewels of Stringology, World Scientific, 2002. • D. Gusfield. Algorithms on strings, trees, and sequences: computer science and computational biology. Cambridge University Press, 1997. <p><i>Course frequency:</i> irregular</p>	<p>4 WLH</p>
<p>Course: Advanced Topics on Algorithms (Lecture, Exercise) <i>Contents:</i> In this course we present a series of selected results on data structures and efficient algorithms, and discuss a series of areas in which they can be applied successfully. The emphasis of the course is on the theory, we also approach the problem of a practical implementation of the presented algorithms.</p>	<p>4 WLH</p>

<p>We expect that the students that will participate in this lecture will become familiar with efficient sorting and searching methods, advanced data structures, dynamic data structures, as well as other efficient algorithmic methods, they will be able to estimate the complexity of those algorithms, and they will be able to apply those algorithms to particular programming problems (from practical or theoretical settings).</p> <p>The main topics our course will cover are: efficient sorting and searching (non-comparison based methods, van Emde Boas trees, Radix Sort), advanced tree-structures (Fibonacci heaps, B-Trees, structures for working with disjoint sets), dynamic data structures (range minimum queries, lowest common ancestor, applications to string algorithms: suffix arrays, suffix trees), Hashing and Dictionaries, Young tableaux, geometric algorithms (convex hull), number theoretic algorithms. The presentation of each theoretical topic from the above will be accompanied by a brief discussion on its possible applications.</p> <p>Literature</p> <ul style="list-style-type: none"> • T.H. Cormen, C.E. Leiserson, R.L. Rivest, C. Stein: Introduction to Algorithms (3rd Edition), MIT Press, 2009. • E. NICHT-AMTLICHE FASSUNG

Georg-August-Universität Göttingen		8 C 4 WLH
Module B.Psy.902: Biological Psychology: Neurosciences		
Learning outcome, core skills: Students acquire extended basic knowledge and concepts of neuroscientific biopsychology in the fields of neuroscience methods, evolution of the nervous system, individual development, somatosensation, neuroplasticity, pain, multisensory integration, sensorimotor neuroscience, decision making, executive functions, attention, psychopathology, and psychopharmacology. Students acquire in-depth knowledge in a selected subject area. Academic achievements: Students deepen their knowledge through documented individual or group work (seminar hour) with their own oral presentation and active participation in discussions on other presentations.		Workload: Attendance time: 56 h Self-study time: 184 h
Course: Biological Psychology: Neurosciences 1 (Lecture)		2 WLH
Course: Biological Psychology: Neurosciences 2 (Seminar)		2 WLH
Examination: Written examination (60 minutes)		8 C
Examination requirements: Students provide proof of knowledge about the foundations and concepts in neuroscientific biopsychology in the fields of neuroscience methods, evolution of the nervous system, individual development, somatosensation, neuroplasticity, pain, multisensory integration, sensorimotor neuroscience, decision making, executive functions, attention, psychopathology, and psychopharmacology.		
Admission requirements: B.Psy.101, B.Psy.102	Recommended previous knowledge: B.Psy.204, B.Psy.901	
Language: German	Person responsible for module: Prof. Dr. Alexander Gail	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: from 5	
Maximum number of students: not limited		
Additional notes and regulations: Max. number of participants: Lecture: not limited Seminar: 30 participants		

Georg-August-Universität Göttingen		6 C 6 WLH
Module M.Agr.0052: Ecology and Nature Conservation		
Learning outcome, core skills: Die Studierenden sollen die Lebensraumtypen und Lebensgemeinschaften der Agrarlandschaften so kennenlernen, dass sie Bewertungen unter Naturschutzgesichtspunkten vornehmen können. Dazu gehört ein tiefes und interdisziplinäres Verständnis von Biodiversitätsmustern und ökologischen Prozessen, wie sie nur durch eine Integration von Ökologie, Umweltökonomie, Nutzpflanzen- und Nutztierwissenschaften erfolgen kann. Zudem werden statistische Fertigkeiten erworben, die für den Test komplexer Fragestellungen wichtig sind.		Workload: Attendance time: 79 h Self-study time: 101 h
Course: Bewertung und Pflege von Lebensräumen (Exercise, Seminar) <i>Contents:</i> Charakterisierung der Lebensräume der Agrarlandschaft, biologische Schädlingsbekämpfung und Räuber-Beute-Beziehungen, Biotopvernetzung und genetische Differenzierung isolierter Populationen, Versuchsplanung bei ökologischen Fragestellungen, Landschaftsplanung und Biotopbewertung, interdisziplinäre Perspektive auf Fragen der umweltfreundlichen Agrarproduktion, naturschutzgerechten Landschaftsplanung und Ressourcenmanagements.		4 WLH
Examination: Präsentation, Referat oder Korreferat (Gewicht: 60%, Dauer: ca. 20 Minuten) und Hausarbeit (Gewicht: 40%, Umfang: max. 25 Seiten) Examination prerequisites: Teilnahme an den Diskussionen und praktischen Übungen, Anwesenheitspflicht, max. 2 Fehltermine Examination requirements: Interdisziplinäre Sichtweise auf Probleme im Spannungsfeld von Landwirtschaft und Naturschutz		3 C
Course: Landwirtschaft und Naturschutz (Seminar) <i>Contents:</i> Interdisziplinäre Perspektive auf Fragen der umweltfreundlichen Agrarproduktion, naturschutzgerechten Landschaftsplanung und des Ressourcenmanagements in multifunktionalen Agrarlandschaften.		2 WLH
Examination: Präsentation, Referat oder Korreferat (ca. 20 Minuten) Examination prerequisites: Prüfungsvorleistung: aktive Teilnahme an den Diskussionen und praktischen Übungen, Anwesenheitspflicht, max. 2 Fehltermine Examination requirements: Grundlegende Kenntnisse im Bereich der Bewertung und Pflege von Lebensräumen.		3 C
Admission requirements: none	Recommended previous knowledge: none	
Language:	Person responsible for module:	

German	Prof. Dr. Catrin Westphal
Course frequency: each winter semester	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester:
Maximum number of students: 25	

NICHT-AMTLICHE FASSUNG

Georg-August-Universität Göttingen Module M.Agr.0061: Practical Course Nature Conservation in Agricultural Landscapes		6 C 4 WLH
Learning outcome, core skills: Die Studierenden sollen lernen, wie man sich selbständig eine innovative Fragestellung erarbeitet und wie ein Versuchsdesign ausschauen kann, das zur Beantwortung dieser Frage geeignet ist. Die Erfahrung mit selbständiger Anlage und Auswertung von Experimenten ist eine elementare Grundlage für wissenschaftliches Arbeiten, wie es letztlich bei der Masterarbeit gefordert ist. Zudem erlaubt die kritische Diskussion der Vorgehensweise, die Glaubwürdigkeit von wissenschaftlichen Arbeiten und Gutachten besser zu beurteilen.		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Projektpraktikum Naturschutz in der Agrarlandschaft (Internship, Seminar) <i>Contents:</i> Selbständige Erarbeitung von Problemstellungen und Versuchen zur Fragen des Naturschutzes in der Agrarlandschaft. Die Studierenden erarbeiten eine innovative Fragestellung und ein zum Testen der jeweiligen Hypothesen geeignetes Versuchsdesign. Der Versuchsplan wird im Plenum vorgestellt und diskutiert. Die Feld- und Laborexperimente finden danach weitgehend selbständig statt. Die statistische Auswertung der Ergebnisse wird Teil eines Protokolls, das wie eine wissenschaftliche Arbeit aufgebaut sein soll (Einleitung, Methoden, Ergebnisse, Diskussion). Bei allen Schritten findet eine intensive Betreuung und Anleitung statt.		4 WLH
Examination: Hausarbeit (max. 20 Seiten, 70%) und Präsentation, Referat oder Korreferat (ca. 12 Minuten, 30%) Examination requirements: Erfahrung mit selbständiger Anlage und Auswertung von Experimenten. Kenntnisse zur statistischen Auswertung der gewonnenen Ergebnisse. Referat: In einem 12-minütigen Referat werden die Ergebnisse der Felduntersuchungen präsentiert und kritisch diskutiert. Dies beinhaltet neben einer kurzen Einleitung die Darstellung der Untersuchungshypothesen, Feld-/Labormethoden, statistische Datenauswertung und eine Diskussion der Ergebnisse unter Einbeziehung von Sekundärliteratur, wie z.B. wissenschaftlichen Fachpublikationen (30% der Modulnote). Hausarbeit: In einer schriftlichen Hausarbeit (Umfang max. 20 Seiten) werden die Versuche im Stil einer wissenschaftlichen Veröffentlichung dargelegt. Die Hausarbeit wird hierbei gegliedert in: Zusammenfassung, Einleitung, Hypothesen, Methoden, Resultate, Diskussion und Quellen. Neben formalen Aspekten (z.B. Darstellung der Ergebnisse, Orthografie, korrekte Zitierweise) steht insbesondere die Diskussion der eigenen Ergebnisse unter Berücksichtigung der wissenschaftlichen Fachliteratur im Fokus der Prüfungsanforderungen (70% der Modulnote).		6 C

NICHT-AMTLICHE FASSUNG

Georg-August-Universität Göttingen		3 C
Module M.Bio.141: General and applied microbiology		3 WLH
Learning outcome, core skills: Learning outcome: Evolution and phylogenetic system; morphology and cell biology; communities and biocoenosis of bacteria and archaea; gene expression and molecular control (transcription, translation); posttranslational control, protein stability and proteomics; genetic networks; molecular switches and signal transduction; microbial developmental biology; mechanisms of pathogenicity of important pathogens; development of new antimicrobial agents; diversity of the metabolism in bacteria and archaea as basis for biotechnological applications; industrial microbiology. Core skills: Knowledge of microorganisms relevant for biotechnology and medicine, ability to identify these organisms and to analyse them with molecular methods.		Workload: Attendance time: 42 h Self-study time: 48 h
Course: lecture: General and applied microbiology (Lecture)		3 WLH
Examination: Written examination (90 minutes)		3 C
Examination requirements: detailed knowledge in cell biology, biochemistry and genetics of procaryotic microorgansims		
Admission requirements: can't be combined with core module M.Bio.101	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Jörg Stülke	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 10		

Georg-August-Universität Göttingen	3 C 3 WLH
Module M.Bio.142: Molecular genetics and microbial cell biology	
Learning outcome, core skills: Advanced knowledge of Molecular Genetics and microbial cell biology through case studies of model systems of molecular mycology (yeasts and filamentous fungi). Acquisition of knowledge up to the "Review" level in one topic.	Workload: Attendance time: 42 h Self-study time: 48 h
Course: Molecular genetics and microbial cell biology (Lecture)	3 WLH
Examination: Written examination (90 minutes)	3 C
Examination requirements: detailed knowledge in cell biology, biochemistry and genetics of eucaryotic microorganisms	
Admission requirements: Can't be combined with core module M.Bio.102 or key competence module M.Bio.172.	Recommended previous knowledge: <ul style="list-style-type: none"> • Watson, Molecular Biology of the Gene, Pearson, 7th Edition • Alberts, Molecular Biology of the Cell, Garland, 5th Edition
Language: English	Person responsible for module: Prof. Dr. Gerhard Braus
Course frequency: each winter semester	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester:
Maximum number of students: 10	

Georg-August-Universität Göttingen		3 C 3 WLH
Module M.Bio.144: Cellular and molecular biology of plant-microbe interactions		
Learning outcome, core skills: Introduction into theory and methods for the analysis of plant-microbe interactions on the cell biological and molecular level.		Workload: Attendance time: 42 h Self-study time: 48 h
Course: lecture: Plant-microbe-interactions (Lecture)		3 WLH
Examination: Written examination (54 minutes)		3 C
Examination requirements: knowledge of basic concepts in plant-microbe-interactions		
Admission requirements: Can't be combined with core module M.Bio.104	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Christiane Gatz Prof. Dr. Volker Lipka	
Course frequency: each summer semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 10		

Georg-August-Universität Göttingen		3 C
Module M.Bio.157: Biochemistry and biophysics		3 WLH
Learning outcome, core skills: Molecular biochemistry and biophysics of different classes of biomolecules, plant primary and secondary metabolism, lipid metabolism, lipids as signal molecules and secondary metabolites, biotechnological utilization and modification of storage substances, enzymes of lipid metabolism, modern biophysical methods for analysis of biomolecules Handling of state of the art equipment, critical dealing with current biochemical topics, detailed analysis of experiments and their presentation. Independent acquisition of professional knowledge from publications by active participation in the seminar.		Workload: Attendance time: 42 h Self-study time: 48 h
Course: lecture: Biochemistry and Biophysics (Lecture)		3 WLH
Examination: Written examination (90 minutes)		3 C
Examination requirements: <ul style="list-style-type: none"> • basic knowledge of different classes of biomolecules and their metabolism • knowledge about spectroscopy of molecules • biotechnologic techniques using plants 		
Admission requirements: can't be combined with M.Bio.106	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Ivo Feußner	
Course frequency: each summer semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 2	
Maximum number of students: 10		

Georg-August-Universität Göttingen		12 C 14 WLH
Module M.Bio.310: Systems biology		
Learning outcome, core skills: Subject of this module are the formal description, modeling, analysis and simulation of complex interactions between the components (molecules, cells, organs) of living systems on different levels of abstraction. Biomolecular networks, like networks of metabolic signaling and transduction will be introduced and various graph based abstractions of interaction networks will be demonstrated (entity interaction graph, boolean networks, Petri networks). The students will get to know basics of the graph theory (analysis of paths, cluster coefficients, centrality, etc.) and they will learn how to apply the respective theory to biomolecular networks. The students will be introduced to different high-throughput techniques and their application to biomolecular networks. The simulation of molecular networks will be presented by selected examples.		Workload: Attendance time: 147 h Self-study time: 213 h
Course: Bioinformatics of systems biology (Lecture)		2 WLH
Examination: Oral examination (approx. 30 minutes)		6 C
Course: Bioinformatics of systems biology (Exercise)		2 WLH
Course: Bioinformatics of systems biology (Seminar)		1 WLH
Course: Methods course 'Modelling and analysis of biological systems' 3 weeks full time		9 WLH
Examination: Minutes / Lab report (max. 10 pages)		6 C
Examination prerequisites: oral presentation (ca. 30 min), regular attendance		
Examination requirements: Ability to model, analyze and simulate biomolecular networks		
Admission requirements: can't be combined with M.Bio.340	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Tim Beißbarth	
Course frequency: each summer semester; verschieden; siehe Lehrveranstaltungen	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 10		

Georg-August-Universität Göttingen Module M.Bio.323: Introduction to Bayesian Statistics and Information Theory	12 C 12 WLH
Learning outcome, core skills: The students learn the basic concepts and main applications of Bayesian Statistics, in particular Bayesian probabilities, parameter estimation and Bayesian credible intervals, importance and choice of prior distributions based on prior knowledge, Bayesian hypothesis testing, model tests and MCMC methods. All concepts will be presented in lectures and worked with in hands-on computer assignments. The module closes with a foray into information theory.	Workload: Attendance time: 195 h Self-study time: 165 h
Course: Introduction to Bayesian Inference and Information Theory (Lecture)	3 WLH
Course: Classical problems in Bayesian Interference (Seminar)	1 WLH
Course: Programmierkurs	8 WLH
Examination: Written examination (90 minutes) Examination prerequisites: regular attendance, oral presentation in seminar	12 C
Examination requirements: Knowledge of the foundations of Bayesian probabilities and statistics and the ability to solve simple classic problems in Bayesian Inference.	
Admission requirements: basic computer knowledge, basic experience in coding	Recommended previous knowledge: basics in probability calculation
Language: English	Person responsible for module: Prof. Dr. Michael Wibrat
Course frequency: each winter semester	Duration:
Number of repeat examinations permitted: twice	Recommended semester:
Maximum number of students: 10	

Georg-August-Universität Göttingen		3 C
Module M.Bio.344: Neurobiology 1 (key competence module)		2 WLH
Learning outcome, core skills: Profound knowledge of essential techniques in molecular, cellular and systemic neuroscience and their application.		Workload: Attendance time: 28 h Self-study time: 62 h
Course: From gene to behavior (Lecture)		2 WLH
Examination: Written examination (60 minutes)		3 C
Examination requirements: Theoretical knowledge of the basic methods in neuroscience based on the contents of the lecture.		
Admission requirements: can't be combined with module M.Bio.304	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Martin Göpfert	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 27		

Georg-August-Universität Göttingen Module M.Bio.373: Visual psychophysics - from theory to experiment	3 C 2 WLH
Learning outcome, core skills: This introductory course is a mixture of lecture, seminar and practical exercises and emphasizes the importance of psychophysics as a central method in human perceptual and sensorimotor research. As well as gaining an understanding of the underlying theoretical principles, by the end of the course students should be able to critically assess published studies and to design and conduct their own simple psychophysical experiments.	Workload: Attendance time: 28 h Self-study time: 62 h
Course: Psychophysics advanced (computer-pool-practical)	1 WLH
Course: Psychophysics basics (Lecture)	1 WLH
Examination: Written examination (60 minutes) Examination prerequisites: regular attendance Examination requirements: Die Studierenden erbringen den Nachweis, dass sie die grundlegenden Methoden der Psychophysik kennen. Sie besitzen das theoretische Fachwissen um kleinere psychophysische Studien durchzuführen.	3 C
Examination requirements: Ability to demonstrate knowledge of the fundamental methods of psychophysics. Capability of conducting simple psychophysical studies.	
Admission requirements: attendance in the lecture: Biologische Psychologie II/ Kognitive Neurowissenschaften orequivalent course. The participation in the course M.Bio.373 "MATLAB in Biospsychology and Neuroscience" during the first half of the term is strongly advised.	Recommended previous knowledge: none
Language: English	Person responsible for module: Prof. Dr. Stefan Treue
Course frequency: each summer semester; second half	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester:
Maximum number of students: 20	
Additional notes and regulations: Die Veranstaltung ist geeignet für hoch motivierte Bachelor- und Master-Studierende der Psychologie, Biologie und Physik, die überdurchschnittliches Forschungsinteresse haben.	

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.DH.01: Advanced Topics in Digital Humanities		
Learning outcome, core skills: The students <ul style="list-style-type: none"> • have an overview of central methods and theories from one or more subject areas of the Digital Humanities; • are able to comprehend and discuss the scientific discussions about it; • are familiar with the complexity, heterogeneity or fuzziness of data in the humanities and the specific characteristics of the Digital Humanities; • know typical examples for the scientific categorisation of texts, persons, images and objects, ideas and processes and can relate them to each other; • can discuss, test and, if necessary, modify these approaches with regard to their applicability. 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Lecture		2 WLH
Course: Seminar		2 WLH
Examination: Presentation (approx. 20 min.) with written elaboration (max. 10 pages) Examination prerequisites: Regular participation in the seminar Examination requirements: The students discuss research results of the Digital Humanities and have the ability to evaluate methods and theories and to modify them in approaches.		6 C
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Martin Langner	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 20		

Georg-August-Universität Göttingen		9 C 4 WLH
Module M.DH.10: Theories and Research Questions in Digital Language Analysis		
Learning outcome, core skills: The students <ul style="list-style-type: none"> • know the possibilities of comprehensive digital language development and analysis; • can analyse grammatical structures of a lexical, morphological, phonetic-phonological, syntactic, semantic and discursive nature of written or spoken language using digital means and are familiar with their use in linguistic and extralinguistic contexts (pragmatics and discourse); • possess the ability to answer humanities questions from the core areas of linguistics using computer-assisted methods; • are able to digitally model the specific characteristics of language and relate these to each other as well as to the extralinguistic context. 		Workload: Attendance time: 56 h Self-study time: 214 h
Course: Seminar		2 WLH
Examination: Presentation (approx. 30 min.) with written elaboration (max. 15 pages) Examination prerequisites: Regular participation in the seminar and digital implementation of the exercises. Examination requirements: Students reflect on the results of specific linguistic research and have the ability to evaluate methods and theories and to modify them in approaches. The examination is to be taken in the seminar.		9 C
Course: Exercise		2 WLH
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Caroline Sporleder	
Course frequency: each summer semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 20		

Georg-August-Universität Göttingen		9 C 4 WLH
Module M.DH.11: Theories and Research Questions in Digital Text Analysis		
Learning outcome, core skills: The students <ul style="list-style-type: none"> • know the possibilities of comprehensive digital text indexing, analysis and presentation; • have an overview of computer-assisted research questions from the whole spectrum of philological and cultural-historical disciplines, starting with the digitisation of data and the construction of suitable corpora for specific questions, through their manual and automatic preparation, to the selecting and applying appropriate methods of text analysis and the textminings as well as for the evaluation and presentation of the results; • are able to digitally acquire, analyse and model the specific characteristics of texts and text collections; • are able to evaluate the approaches used and to reflexively apply the analytical knowledge to themselves and their actions. 		Workload: Attendance time: 56 h Self-study time: 214 h
Course: Seminar		2 WLH
Examination: Presentation (approx. 30 min.) with written elaboration (max. 15 pages) Examination prerequisites: Regular participation in the seminar as well as successful digital implementation of the given exercises. Examination requirements: Students reflect on the results of specific research in textual studies and have the ability to evaluate and modify methods and theories. The examination is to be taken in the seminar.		9 C
Course: Exercise		2 WLH
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Caroline Sporleder	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 20		

Georg-August-Universität Göttingen		9 C 4 WLH
Module M.DH.12: Theories and Research Questions in Digital Literature Analysis		
Learning outcome, core skills: The students <ul style="list-style-type: none"> • have an overview of methods and research questions in digital literary studies; • know computer-assisted procedures for indexing, processing, analysing and presenting literary works; • are also familiar with different forms of digital literature (such as fan fiction, collaborative fiction, computer-generated literary works or lay and expert reviews); • know possibilities of digital mediation between the texts and the historical or contemporary circumstances as well as the analysis of their meanings and have the ability to discuss these in a fundamental reflection on methods; • are able to evaluate the approaches used and to reflexively apply the analytical knowledge to themselves and their actions; • are able to digitally model the scientific categorisations of persons, texts, spaces, ideas or processes and relate them visually to each other. 		Workload: Attendance time: 56 h Self-study time: 214 h
Course: Seminar		2 WLH
Examination: Presentation (approx. 30 min.) with written elaboration (max. 15 pages) Examination prerequisites: Regular participation in the seminar as well as successful digital implementation of the given exercises. Examination requirements: Students reflect on the results of specific research in literary studies and have the ability to evaluate and modify methods and theories. The examination is to be taken in the seminar.		9 C
Course: Exercise		2 WLH

Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 20		

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.FES.111: Introduction to Ecological Modelling		
Learning outcome, core skills: Basic knowledge of classic and modern approaches for modelling dynamics of populations and communities. Skilled in analytical thinking, independent application of models for practical research questions, development of simple models, and critical assessment of the possibilities and limitations of different modeling approaches. Ability to develop an effective model concept.		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Introduction to ecological modelling (Lecture, Exercise) <i>Contents:</i> Using examples from ecology in general and forest ecology in specific, we will cover the following modelling approaches and types: population growth (considering demographic and environmental noise, scramble and contest competition), metapopulation models, predator-prey models, forest growth models, patterns and dynamics of biodiversity, island biogeography, life tables, matrix models, individual-based models, and spatial models. We will also address how to develop a model concept. The course will consist of a mixture of lectures and hands-on work on the computer.		4 WLH
Examination: Term paper (max. 3 pages, 50%) and written examination (45 minutes, 50%)		6 C
Examination requirements: Term paper: Ability to develop an effective model concept. Written examination: Knowledge and understanding of essential characteristics of the modelling approaches covered in class. Ability to interpret model results. Knowledge of possibilities and limitations of the models.		
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Kerstin Wiegand	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: cf. examination regulations	Recommended semester:	
Maximum number of students: 20		

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.FES.114: Ecosystem - Atmosphere Processes		
Learning outcome, core skills: Understanding the carbon and water cycle of terrestrial ecosystems requires a solid understanding of biogeophysical and biogeochemical processes at the ecosystem – atmosphere interface. These processes are directly affected by human induced alterations of the climate system such as climate change and land use. In this course, the students will learn about ecosystem – atmosphere processes based on real datasets from forests and other terrestrial ecosystems. The student will be exposed to a quantitative analysis of the data and will gain basic insights into land surface modelling considering land use as well as climate change.		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Ecosystem – Atmosphere Processes (Lecture, Seminar)		2 WLH
Course: Ecosystem – Atmosphere Processes (Exercise)		2 WLH
Examination: Written examination (90 minutes)		6 C
Examination requirements: The student will learn about biogeophysical and biogeochemical processes at the ecosystem – atmosphere interface. They will have the ability to formulate these processes in the programming language R and describe them quantitatively.		
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Alexander Knohl	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: cf. examination regulations	Recommended semester:	
Maximum number of students: not limited		

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.FES.122: Ecological Simulation Modelling		
Learning outcome, core skills: <ul style="list-style-type: none"> • Knowledge of the modelling techniques covered; • Ability to find a suitable modeling technique for a given problem in the area of ecology and to apply it independently; • Knowledge of the current state of research in ecological modelling; • Critical appreciation and discussion of research results; • Refined presentation techniques; • Knowledge of constructive feedback techniques. 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Simulation modelling (Lecture, Exercise)		3 WLH
Course: Current Topics in Ecological Modelling (Seminar)		1 WLH
Examination: Term paper (max. 10 pages, 75%) and presentation (approx. 20 minutes) with written outline (25%)		6 C
Examination requirements: <ul style="list-style-type: none"> • Know, explain, apply, analyse and assess model types that are applied in ecology • Know, explain, apply, analyse and assess the stages of model development along the modeling cycle • Understand and summarize published model studies and point out and discuss their possibilities and limitations • Moderate presentations and discussions 		
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Kerstin Wiegand	
Course frequency: each summer semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: cf. examination regulations	Recommended semester:	
Maximum number of students: 20		
Additional notes and regulations: 20 students are only possible if a corresponding number of computers is available. Module is also applicable for other study programs, such as MSc "Biological Diversity and Ecology", MSc "Agriculture" (specialization Ressourcenmanagement).		

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.FES.124: Modern Concepts and Methods in Macroecology and Biogeography		
Learning outcome, core skills: The course will introduce students to the principles and modern methods in macroecology and biogeography. Students will gain a comprehensive understanding of the physical and biological processes influencing species distributions and diversity patterns worldwide. Additionally, students will be introduced to modern environmental and biodiversity modelling methods in R, which are important for analyzing and understanding the consequences of global change on species distributions. In self-directed projects, students will work with real data to solve modern macroecological problems. Through these theoretical and practical classes, students will gain a profound understanding of modern macroecological and biogeographical concepts, including threats to biodiversity and conservation prioritization.		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Modern concepts and methods in macroecology and biogeography (Lecture, Exercise) <i>Contents:</i> Exercise = Computer course (3 WHL) and Lectures (1 WHL)		4 WLH
Examination: Term Paper (max. 20 pages)		6 C
Examination requirements: Students can apply knowledge about modern concepts and methods in macroecology and biogeography. They demonstrate knowledge on how to plan, conduct and report on a macroecological analysis using modern computer software.		
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Holger Kreft	
Course frequency: each summer semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: cf. examination regulations	Recommended semester:	
Maximum number of students: not limited		

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.FES.223: Experimental Bioclimatology		
Learning outcome, core skills: The student will learn about measuring, analyzing and interpreting bioclimatological processes in terrestrial ecosystems such as air temperature, air humidity, wind velocity, air pressure, radiation and their impacts on CO ₂ , water and energy fluxes. After a seminar part, the students will install a fully equipped meteorological station and analyze the data and evaluate the meteorological conditions and ecosystem-atmosphere exchange processes of a site.		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Experimental bioclimatology (Seminar)		2 WLH
Course: Experimental bioclimatology (Exercise)		2 WLH
Examination: Presentation (approx. 20 minutes) with written outline (max. 2 pages) (50%) and protocol (max. 10 pages) (50%)		6 C
Examination requirements: Understanding of bioclimatological processes and how they are measured. Ability to work with meteorological instruments, analyse and interpret data.		
Admission requirements: Ecosystem - Atmosphere Processes	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Alexander Knohl	
Course frequency: each summer semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: cf. examination regulations	Recommended semester:	
Maximum number of students: 25		

Georg-August-Universität Göttingen		12 C 2 WLH
Module M.FES.231: Project: Ecosystem Sciences		
Learning outcome, core skills: Using and applying modern methods in ecosystem sciences to work independently on a research project; autonomous acquisition of know-how and competencies for scientific problem solving; ability to interdisciplinary, strategic thinking; team work and organisation of tasks, scientific presentation and discussion; writing a final report in the style of a scientific article.		Workload: Attendance time: 28 h Self-study time: 332 h
Course: Project: Ecosystem Sciences (Seminar) <i>Contents:</i> Each topic will be proposed by a researcher from the Faculty of Forest Sciences and Forest Ecology who will then be the principal supervisor for this topic. To support an interdisciplinary character of the project, a second supervisor may come from a department different from that of the principal supervisor. A topic can be worked upon by a single student or by a team of two or three students. In the case of teamwork, the final report must contain sections which can be attributed to one individual author.		2 WLH
Examination: Presentation (approx. 20 minutes, 30 %) and term paper (max. 15 pages, 70%)		12 C
Examination requirements: Demonstration of ability to conduct, analyse and report on an independent scientific research project.		
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Alexander Knohl	
Course frequency: each semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: cf. examination regulations	Recommended semester:	
Maximum number of students: not limited		
Additional notes and regulations: Will be coordinated by A. Knohl in the summer semester and by A. Polle in the winter semester		

Georg-August-Universität Göttingen		6 C (incl. key comp.: 6 C)
Module M.FES.712: Bioclimatology and global change		4 WLH
Learning outcome, core skills: Scientific basis of climate and climate change, trace gas budgets of soils and whole ecosystems and the potential to sequester carbon and nitrogen in managed and unmanaged terrestrial ecosystems.		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Bioclimatology and global change (Lecture) <i>Contents:</i> The module "Bioclimatology and Global Change" will introduce the students to the global climate system and its interaction with the biosphere. A lecture course will focus on the scientific basis of climate and climate change covering basic physical and chemical processes governing the climate system, climate zones, modelling as well as global and regional climate phenomena with a focus on tropical climates. A seminar course will highlight trace gas budgets of soils and whole ecosystems and their potential to sequester carbon and nitrogen in managed and unmanaged terrestrial ecosystems and their vulnerability to climate change. Using journal literature the students will work out oral presentations concerning current research topics concerning the global climate system and its interaction with the biosphere.		4 WLH
Examination: Written exam (90 minutes, 50%) and oral presentation (approx. 20 minutes, 50%)		6 C
Examination requirements: Understanding the most relevant processes at the biosphere-atmosphere interface and of biogeochemical cycles. Being able to find, read, evaluate, and present scientific literature related to Global Change.		
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Alexander Knohl	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: cf. examination regulations	Recommended semester:	
Maximum number of students: 30		

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.FES.726: Ecological Modelling with C++		
Learning outcome, core skills: <ul style="list-style-type: none"> • Implementing ecological questions in model structures • Independently develop simulation models • Programming with C++ • Proficiency in the use of software dedicated to programming C++ • Commenting and documenting program code 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Ecological modelling with C++ (Lecture, Exercise) <i>Contents:</i> The module conveys advanced knowledge of modelling ecological questions. The focus is on the implementation of ecological models with the programming language C++. The module covers the fundamentals of C++ to the degree necessary for the implementation of models. Programming skills are applied in an independent modelling project implementing an own model question. The modelling project is documented in the term paper.		4 WLH
Examination: Term Paper (max. 20 pages)		6 C
Examination requirements: Develop ecological questions and translate them into model structures; Read and understand C++; implement model independently.		
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Kerstin Wiegand	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: cf. examination regulations	Recommended semester:	
Maximum number of students: 14		

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.Geg.02: Resource Utilisation Problems		
<p>Learning outcome, core skills: Die Studierenden können die Bedeutung der Ressourcen Boden und Wasser als Bestandteile von Ökosystemen und Lebensgrundlage des Menschen aufzeigen und das globale sowie regional differenzierte Ausmaß der Gefährdung und Degradation dieser Ressourcen benennen. Sie sind in der Lage, das DPSIR-Konzept, durch das die Beziehungen Drivers – Pressures – State – Impacts – Responses verdeutlicht werden können, auf verschiedene Ressourcennutzungsprobleme anzuwenden. Sie kennen die Reference Soil Groups der World Reference Base for Soil Resources, sowie die spezifischen Bodeneigenschaften und daraus resultierenden Nutzungsmöglichkeiten, –einschränkungen und Gefährdungen der verschiedenen Böden.</p> <p>Modulinhalte: Eigenschaften, Nutzungsmöglichkeiten und –probleme verschiedener Böden (mit Schwerpunkt auf feuchte Tropen und Subtropen sowie Trockengebiete), Bodengefährdungen, Faktoren und Prozesse der Bodendegradation, Ursachen, Ausmaß und Arten der Bodendegradation in Europa, Desertifikation, regional differenzierte Auswirkungen des Klimawandels auf die Ressourcen Boden und Wasser, globale Verteilung von Wasserangebot und –nachfrage, Wasserverbrauch nach Sektoren, Wassermangel, Ursachen und Ausmaß von Problemen mangelnder Wasserqualität, regionale Unterschiede in der Versorgung mit sanitären Anlagen und sauberem Trinkwasser.</p>		<p>Workload: Attendance time: 56 h Self-study time: 124 h</p>
Course: Ressourcennutzungsprobleme (Lecture)		2 WLH
Course: Ressourcennutzungsprobleme (Seminar)		2 WLH
Inkl. Geländetage zur Bearbeitung einer Fragestellung im Rahmen eines kleinen Projekts.		
<p>Examination: Written examination (90 minutes) Examination prerequisites: Regelmäßige Teilnahme am Seminar; Referat mit schriftl. Ausarbeitung bzw. schriftlichem Beitrag zum Projektbericht oder Poster (ca. 30 Min., max. 20 S. bzw. 1 DIN A 0 Poster) Examination requirements: Die Studierenden erbringen den Nachweis, dass sie Probleme der Boden- und Wassernutzung überblicken und spezifische Degradationsursachen sowie -prozesse verstehen. Sie zeigen, dass sie geeignete situationsbezogene Verfahren des nachhaltigen Umgangs mit Böden und Wasser kennen. Die Erstellung des Beitrags zum Projektbericht oder die Postererstellung als Prüfungsvorleistung machen die Mitwirkung bei der Projektbearbeitung erforderlich.</p>		6 C
Admission requirements: none	Recommended previous knowledge: Grundlagen der Bodengeographie	

Language: German	Person responsible for module: Prof. Dr. Daniela Sauer
Course frequency: each summer semester	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester: from 2
Maximum number of students: 42	

NICHT-AMTLICHE FASSUNG

Georg-August-Universität Göttingen		6 C
Module M.Geg.17: Landscape Ecology		4 WLH
Learning outcome, core skills: <p>The students know the components of element, water and energy budgets and fluxes in landscapes, and the most important element cycles. They are familiar with assessing soil properties and soil distribution patterns in landscapes, and with the measurement of microclimatic parameters.</p> <p>The students are able to generate hypotheses on the mutual relationships relief-soils-microclimate, to develop appropriate strategies for testing their hypotheses and to apply them in practice.</p> <p>The students have the competency to work on a research question in small international, culturally diverse teams, in a creative and outcome-oriented way. Thereby, they appreciate diverse cultural backgrounds and different approaches to handle a task. They are able to reflect on these in a constructive way and to jointly develop strategies for solving their research questions.</p>		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Landscape-ecological methods (Lecture)		1 WLH
Course: Landscape-ecological theory (Lecture)		1 WLH
Course: Landscape-ecological project (Seminar) with project-type components to be carried out in small international teams including measurements in the field.		2 WLH
Examination: Presentation (ca. 30 Min.) with written report (max. 20 p.) or DIN A 0 poster Examination prerequisites: Presentation (ca. 30 Min.) with written report (max. 20 p.) or DIN A 0 poster		6 C
Examination requirements: The students proof that they are able to generate hypotheses on the mutual relationships relief-soils-microclimate, to develop appropriate strategies for testing their hypotheses, considering different perspectives, and to apply them in practice. They proof that they can collaborate in an international team, interpret, document, present, discuss their results, and critically reflect the applied methods and obtained outcomes.

<p>Georg-August-Universität Göttingen</p> <p>Module M.Inf.1171: Cloud and Service Computing</p>	<p>5 C 3 WLH</p>
<p>Learning outcome, core skills:</p> <p>Successfully completing the module, students understand</p> <ul style="list-style-type: none"> • hybrid clouds, consisting of private and public clouds • basic web technologies (transfer protocols, markup languages, markup processing, RESTful and SOAP web services) • virtualization technologies (server, storage, and network virtualization) • data services (sharing, management, and analysis) • continuous integration/continuous delivery • container and orchestration in clouds (e.g. Kubernetes, OpenStack Heat) • monitoring of cloud infrastructures • interoperability in clouds (e.g. Helm) • portability and security • microservices • cloud computing workloads <p>On completion of this module students will have a good understanding of the fundamental and up-to-date concepts used in the context cloud computing. This basic knowledge can be leveraged by students to design, implement, and manage service-oriented cloud infrastructures by themselves.</p>	<p>Workload:</p> <p>Attendance time: 42 h</p> <p>Self-study time: 108 h</p>
<p>Course: Cloud and Service Computing (Lecture, Exercise)</p> <p><i>Contents:</i></p> <p>Cloud Computing is a method of providing shared computing resources, such as applications, computing, storage, networking, development, and deployment platforms. In cloud computing these resources can be delivered as service to the user. Such Service-oriented infrastructures are the backbone of modern IT systems. They pool resources, enable collaboration between people, and provide complex services to end-users. Everybody who uses today's web applications implicitly relies on sophisticated service-oriented infrastructures. The same is true for users of mobile devices such as tablet computers and smart phones, which provide most of their benefits leveraging services.</p> <p>The key challenges of cloud computing infrastructures are related to scaling services. More specifically large cloud-computing infrastructures require scalability of IT management, programming models, and power consumption. The challenges to scale services lie in the inherent complexity of hardware, software, and the large amount of user requests, which large-scale services are expected to handle. This module teaches methods that address and solve those challenges in practice. Key aspects of the module are the management of IT infrastructures, the management of service landscapes, and programming models for distributed applications.</p> <p>The module covers the virtualization of computing, storage, and network resources as the fundament for scaling. IT management is covered by the discussion of deployment</p>	<p>3 WLH</p>

<p>models, service level agreements. Programming models are covered by discussing RESTful and SOAP web-services.</p> <p>Both, lectures and exercises, keep a close connection to the practical application of the discussed topics. The practical value of service-oriented infrastructures is highlighted in the context of enterprises as well as in the context of science. The methods taught in this module benefit from the lecturers' experiences at GWDG and thus provide exclusive insights into the topic. After successfully attending these modules students will understand the most important aspects to design, implement, and manage internet-scale cloud computing infrastructures.</p>		
<p>Examination: Written exam (90 min) or oral exam (approx. 30 min)</p> <p>Examination requirements:</p> <ul style="list-style-type: none"> • Hybrid and Multi cloud infrastructures • RESTful and SOAP web services • Compute, storage, and network virtualisation • Infrastructure-as-a-service, platform-as-a-service, software-as-a-service • Characteristics of Cloud computing (NIST) • Service life cycle • Service level agreements • Cloud computing workloads (e.g. batch, SaaS, big data, back-end) 		5 C

Module M.Inf.1195: Seminar Human in the Age of Artificial Intelligence		
Learning outcome, core skills: This seminar investigates the relationship between Artificial Intelligence and automation and the human, the future of humanity, and ethical decision-making. This will be achieved by research and review of literature about the topic. On completion of this module students : <ul style="list-style-type: none"> • are familiar with the main concepts of the designed course and develop a greater awareness of the benefits and limitations of AI applications. • understand the role of artificial intelligence on Self and in Society. • are able to write a report demonstrating their understanding of the topic. • have improved their presentation skills on the selected topic. • have improved their ability to work independently in a pre-defined context. 		Workload: Attendance time: 28 h Self-study time: 122 h
Course: Human in the Age of Artificial Intelligence (Seminar)		2 WLH
Examination: Presentation (approx. 45 minutes) and written report (max. 15 pages) Examination requirements: The students shall show that: <ul style="list-style-type: none"> • they are able to become acquainted with the topic of the designed course by investigating research publications • they are able to assess and analyze the research on the chosen topic • they are able to present and discuss their finding in a presentation • they are able to write a scientific report according to good scientific practice 		5 C
Admission requirements: none	Recommended previous knowledge: none

Georg-August-Universität Göttingen Module M.Inf.1211: Probabilistic Data Models and Applications		6 C 4 WLH
Learning outcome, core skills: In dem Modul erwerben Studierende spezialisierte Kenntnisse zu Auswahl, Entwurf und Anwendungen von Modellen, für die die (parametrisierte) Zufälligkeit der Daten eine wesentliche Komponente der Modellierung ist. Überblick über die Modulinhalte: Zu verarbeitende Daten in verschiedensten Anwendungsbereichen (z. B. Bioinformatik) unterliegen meist statistischen Gesetzmäßigkeiten. Das Modul ist fokussiert auf Methoden zur Erkennung und algorithmischen Ausnutzung solcher typischen Muster durch geeignete probabilistische Modellierung der Daten und auf die Schätzung der Modellparameter. z. B. Vorlesung Algorithmisches Lernen, Vorlesung Datenkompression und Informationstheorie, Probabilistische Datenmodelle in der Angewandten Informatik.		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Vorlesungen, Übungen und Seminare zu den vorgenannten Themen		
Examination: Klausur (60 Min.) oder mündliche Prüfung (ca. 20 Min.) Examination requirements: Nachweis über den Erwerb spezialisierter Kenntnisse und Fähigkeiten zu probabilistischen Datenmodellen, der Komplexität ihrer algorithmischen Unterstützung und ggf. ihrer Anwendung in einer der Angewandten Informatiken oder einem Anwendungsbereich.		6 C
Admission requirements: none	Recommended previous knowledge: none

Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 50		

Georg-August-Universität Göttingen Module M.Inf.1236: High-Performance Data Analytics	6 C 4 WLH
Learning outcome, core skills: Successfully completing the module, students understand <ul style="list-style-type: none"> • the motivation and use-case for large-scale data analytics • performance implications of hardware and software system for large-scale data workloads • the usage of industry-standard tools to solve data analytics problems • algorithms, data structures, data models, tools, and infrastructure for efficient processing of data 	Workload: Attendance time: 56 h Self-study time: 124 h
Course: High-Performance Data Analytics (Lecture, Exercise) <i>Contents:</i> Data-driven science requires the handling of large volumes of data in a quick period of time. Executing efficient workflows is challenging for users but also for systems. This module introduces concepts, principles, tools, system architectures, techniques, and algorithms toward large-scale data analytics using distributed and parallel computing. We will investigate the state-of-the-art of processing data of workloads using solutions in High-Performance Computing and Big Data Analytics. <i>Topics cover:</i> <ul style="list-style-type: none"> • Challenges in high-performance data analytics • Use-cases for large-scale data analytics • Performance models for parallel systems and workload execution • Data models to organize data and (No)SQL solutions for data management • Industry relevant processing models with tools like Hadoop, Spark, and Paraview • System architectures for processing large data volumes • Relevant algorithms and data structures • Visual Analytics • Parallel and distributed file systems Guest talks from academia and industry will be incorporated in teaching that demonstrates the applicability of this topic. Weekly laboratory practicals and tutorials will guide students to learn the concepts and tools. In the process of learning, students will form a learning community and integrate peer learning into the practicals. Students will have opportunities to present their solutions to the challenging tasks in the class. Students will develop presentation skills and gain confidence in the topics.	4 WLH
Examination: Written exam (90 min) or oral exam (approx. 30 min) Examination requirements: <ul style="list-style-type: none"> • Challenges in high-performance data analytics • Use-cases for large-scale data analytics • Performance models for parallel systems and workload execution • Data models to organize data and (No)SQL solutions for data management • Industry relevant processing models with tools like Hadoop, Spark, and Paraview 	6 C

<ul style="list-style-type: none"> • System architectures for processing large data volumes • Relevant algorithms and data structures • Visual Analytics • Parallel and distributed file systems 	
Admission requirements: none	Recommended previous knowledge: Basic programming skills, Basic knowledge of Linux operating systems, Python

NICHT-AMTLICHE FASSUNG

Georg-August-Universität Göttingen		5 C 2 WLH
Module M.Inf.1237: Seminar Newest Trends in High-Performance Data Analytics		
Learning outcome, core skills: High-Performance Data Analytics is a vehicle to extract findings from large data sets. It is an indispensable tool in science and business but a rapidly changing field. As part of this seminar, you will create a presentation and report revolving around a selected hot topic in German or English. You will learn to research literature and may conduct small experiments to provide a holistic view of the selected topic. You will meet regularly with an assigned supervisor and work towards the presentation and report. The students will be able to <ul style="list-style-type: none"> • Appraise research in the area of high-performance data analytics • Compose a presentation covering their selected topic in depth • Evaluate findings (tools or theory) of other researchers • Explain theory and application covering their topic 		Workload: Attendance time: 28 h Self-study time: 122 h
Course: Seminar Newest Trends in High-Performance Data Analytics (Seminar)		2 WLH
Examination: Presentation (approx. 35 min.) and report (max. 15 pages)		5 C
Examination prerequisites: Participation in the seminar		
Admission requirements: none	Recommended previous knowledge: none	
Language: English, German	Person responsible for module: Prof. Dr. Julian Kunkel	
Course frequency: each summer semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 40		

Georg-August-Universität Göttingen Module M.Inf.1238: Scalable Computing Systems and Applications in AI, BigData and HPC	5 C 3 WLH
Learning outcome, core skills: <ul style="list-style-type: none"> • Describe approaches for the development of scalable systems and applications • Sketch efficient algorithms and concepts • Analyze and summarize state-of-the-art concepts, tools and research papers • Deliver a technical presentation for a professional audience • Explore and apply concepts or tools to improve scalability for a selected use case • Quantify efficiency and scalability of selected use cases 	Workload: Attendance time: 42 h Self-study time: 108 h
Course: Scalable Computing Systems and Applications in AI, BigData and HPC (Seminar) <i>Contents:</i> The module can be considered to consist of a seminar and small-scale practical that are connected by a specific topic. Students will first select a topic and use case, for instance, scalable AI, lock-free data structures, concept or tool. Then, during the term they will prepare a presentation and introduce the topic considering state of the art. Next, a student will realize an individual project by practically working on their topic. They have to evaluate performance and scalability, and then analyze and quantify the contribution of the respective tool. Students can choose on a big variety of topics, some involve concepts and tools. Typically, the evaluation requires some application and programming. More information is provided on the webpage. The results are presented in a final meeting.	3 WLH
Examination: presentation (approx. 30 minutes) and written report (max. 15 pages; without appendix) Examination requirements: See the learning objectives above.	5 C
Admission requirements: none	Recommended previous knowledge: <ul style="list-style-type: none"> • Linux Basics (you have used Linux and the Bash shell). We will provide a short crash course at the beginning of the course and link supplementary training material.

Course: Literaturseminar Bioinformatik (Seminar) <i>Contents:</i> Aktuelle Forschungsarbeiten der Bioinformatik		2 WLH
Examination: Vortrag (ca. 60 Min.) mit schriftlicher Ausarbeitung (max. 10 Seiten)		5 C
Examination requirements: Da im Vortrag nur ein Teil des erarbeiteten Stoffs dargestellt werden kann, ist eine sinnvolle Auswahl zu treffen. Die Unterscheidung zwischen wichtigen und weniger wichtigen Bestandteilen des erlernten Stoffs gehört zu den Aufgaben des Vortragenden. Es wird erwartet, dass der Vortragende nicht nur den vorgetragenen Stoff beherrscht, sondern auch Grundlagen dieses Stoffs, die im Vortrag aus Zeitgründen nicht behandelt werden konnten. Schließlich ist eine schriftliche Zusammenfassung des Vortrags zu erstellen und eine exemplarische Anwendung zu dokumentieren. Die Prüfungs besteht aus Vortrag mit schriftlicher Ausarbeitung inkl. Dokumentation einer Anwendung.		
Admission requirements: none	Recommended previous knowledge: none	
Language: German, English	Person responsible for module: Prof. Dr. Burkhard Morgenstern	
Course frequency: unregelmäßig	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 10		

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.Inf.1504: Algorithms in Bioinformatics II		
Learning outcome, core skills: Students learn algorithms for cluster analysis and analysis of RNA structures, gene prediction in eukaryotes, pattern recognition on sequences, and advanced methods of sequence alignment.		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Algorithmen der Bioinformatik II (Lecture, Exercise)		4 WLH
Examination: Oral examination (approx. 20 minutes)		6 C
Examination requirements: After completion of the module, students should be able to apply known methods from computer science to bioinformatics problems and to critically assess the limits of their applicability.		
Admission requirements: none	Recommended previous knowledge: Basic knowledge of algorithms in bioinformatics, machine learning in bioinformatics, and molecular biology.	
Language: German, English	Person responsible for module: Prof. Dr. Burkhard Morgenstern	
Course frequency: unregelmäßig	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 15		

Georg-August-Universität Göttingen		6 C
Module M.Inf.1806: Seminar and Project Databases		2 WLH
Learning outcome, core skills: Die Studierenden können sich in ein Spezialgebiet moderner Datenbank- und Informationssysteme einarbeiten, Quellen und Dokumentationen im Web suchen und in Beziehung zu dem behandelten Gebiet setzen, Werkzeuge evaluieren sowie in einer Diskussion darstellen und bewerten.		Workload: Attendance time: 28 h Self-study time: 152 h
Course: Projektseminar Datenbanken und Informationssysteme		
Examination: Vortrag (ca. 60 Min.) mit schriftlicher Ausarbeitung (max. 25 Seiten) Examination requirements: Nachweis über den Erwerb vertiefter Kenntnisse und Fähigkeiten in einem Spezialgebiet moderner Datenbank- und Informationssysteme. Insbesondere zur Darstellung und Bewertung von Quellen, Dokumentationen und Werkzeugen. Der Vortrag umfasst eine Präsentation einer Fallstudie.		6 C
Admission requirements: Datenbanken	Recommended previous knowledge: none	
Language: German, English	Person responsible for module: Prof. Dr. Wolfgang May	
Course frequency: unregelmäßig	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 16		

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.Inf.1808: Practical Course on Parallel Computing		
Learning outcome, core skills: Successfully completing the module, students are able to: <ul style="list-style-type: none"> • practically work with a cluster of computers (e.g., using a batch system) • practically utilize grid computing infrastructures and manage their jobs (e.g., Globus toolkit) • apply distributed memory architectures for parallelism through practical problem solving (MPI programming) • utilize shared memory architectures for parallelism (e.g., OpenMP and pthreads) • utilize heterogenous parallelism (e.g., OpenCL, CUDA and general GPU programming concepts) • utilize their previous knowledge in data structures and algorithms to solve problems using their devised (or enhanced) parallel algorithms 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Practical Course on Parallel Computing (Practical course) <i>Contents:</i> As a practical course, the focus will be on the hands-on session and problem solving. Students will get a brief introduction to the topic and then will use the laboratory equipment to solve assignments of each section of the course.		4 WLH
Examination: Oral examination (approx. 20 minutes), not graded Examination requirements: <ul style="list-style-type: none"> • understand how to manage computing jobs using a cluster of computers or using grid computing facilities • understand the configuration of a PBS cluster through practical assignments • practically use LRM clusters and POVray examples • understand cluster computing related topics (error handling, performance management, security) in more depth and using hands-on experience and practically using Globus toolkit • design and implement solutions for parallel programs using distributed memory architectures (using MPI) • design and implement solutions for parallel programs using shared memory parallelism (using OpenMP, pthreads) • practically work with MapReduce programming framework and problem solving using MapReduce • practically work with heterogenous parallelism environment (GPGPU, OpenCL, CUDA, etc.) 		6 C
Admission requirements: <ul style="list-style-type: none"> • Data structures and algorithms • Programming in C/(C++) 	Recommended previous knowledge: <ul style="list-style-type: none"> • Parallel Computing • Computer architecture • Basic knowledge of computer networks • Basic know-how of computing clusters 	

Language: English	Person responsible for module: Prof. Dr. Ramin Yahyapour
Course frequency: unregelmäßig	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester:
Maximum number of students: 20	

NICHT-AMTLICHE FASSUNG

Georg-August-Universität Göttingen		6 C
Module M.Inf.1822: Practical Course in Data Fusion		4 WLH
Learning outcome, core skills: After successful completion of the module, students are able to <ul style="list-style-type: none"> • become acquainted with software tools and frameworks for data fusion • work with modern sensors • collect, process and analyze (sensor) data • implement data fusion algorithms • experimentally evaluate and compare data fusion algorithms • apply data fusion algorithms in the context of localization, navigation, tracking, sensor networks and robotics 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Practical Course in Data Fusion (Practical course)		4 WLH
Examination: Practical project in small groups, oral presentation of results (approx. 15 minutes each), scientific report (max. 6 pages each), not graded Examination requirements: Implementation and evaluation of data fusion algorithms, oral presentation, scientific writing and teamwork.		6 C
Admission requirements: none	Recommended previous knowledge: M.Inf.1185 or M.Inf.1188	
Language: English	Person responsible for module: Prof. Dr. Marcus Baum	
Course frequency: non-periodic	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 15		

Georg-August-Universität Göttingen		6 C
Module M.Inf.1828: Lab Usable Security and Privacy		4 WLH
Learning outcome, core skills: On completion of the module, students should be able to: <ul style="list-style-type: none"> Identify, understand, and analyze usability issues in the field of security and privacy, Design, plan, and conduct a user study to explore a selected issue by following the data protection regulations and taking into account ethical aspects, Document, analyze, and critically discuss the obtained results, Propose future improvements or directions based on the obtained results, Present the study design, methodology, results, and consequences in a written report, Give a presentation about their study and the associated findings. 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Lab Usable Security and Privacy (Practical course)		4 WLH
Examination: Presentation (approx. 20 min.) und written report (max. 15 pages) Examination requirements: The students shall show that: <ul style="list-style-type: none"> They are able to conduct literature research and analyse the issues related to the usability of security and privacy solutions, They are able plan and conduct a user study from its design to the processing and presentation of the results, They are able to write a structured scientific report on their study including its design and the obtained results by respecting the rules of good scientific practice and data protection regulations, They are able to present both their study and the associated results as well as critically discuss them in a presentation. 		6 C
Admission requirements: none	Recommended previous knowledge: Basic knowledge of privacy and usability obtained, e.g., in the recommended lecture "Usable Security and Privacy"	
Language: English	Person responsible for module: Prof. Dr. Delphine Reinhardt	
Course frequency: irregular	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester:	
Maximum number of students: 20		

Georg-August-Universität Göttingen Module M.Inf.1829: Practical course in High-Performance Computing	6 C 4 WLH
<p>Learning outcome, core skills:</p> <p>This practical course is comprised of two parts: firstly, a crash course on the basics of High-Performance Computing is delivered during a one-week tutorial. In a hands-on experience, it covers the theoretical knowledge regarding parallel computing, high-performance computing, supercomputers, and the development and performance analysis of parallel applications. Practical demonstrations encourage you to utilize the GWDG cluster system to execute existing parallel applications, to start developing your own parallel application using MPI and OpenMP, and to analyze the performance of these applications to ensure they run efficiently.</p> <p>During this week, we will use group works and small exercises to foster the training.</p> <p>We will start forming a learning community that will blend into the second part of the course.</p> <p>Equipped with this experience, in the second part, you will team up in groups of two and parallelize a non-trivial problem of your choice. Firstly, you will decide upon a problem you like to solve, then you create a sequential solution to this problem, and lastly, you apply the experience of the block course to parallelize and analyze the scalability of the application.</p> <p>The results will be shared with the peers in a presentation at the end of the term, and documented in a report - these components will be assessed and marked.</p> <p>The students will be able to</p> <ul style="list-style-type: none"> • Construct parallel processing schemes from sequential code using MPI and OpenMP • Justify performance expectations for code snippets • Sketch a typical cluster system and the execution of an application • Characterize the scalability of a parallel application based on observed performance numbers • Analyze the performance of a parallel application using performance analysis tools • Describe the development and executions models of MPI and OpenMP • Construct small parallel applications that demonstrate features of parallel applications • Demonstrate the usage of an HPC system to load existing software packages and to execute parallel applications and workflows • Demonstrate the application of software engineering concepts 	<p>Workload:</p> <p>Attendance time: 56 h</p> <p>Self-study time: 124 h</p>
Course: Practical course in High-Performance Computing (Block course)	4 WLH
<p>Examination: Presentation (approx. 15 min.) and report (max. 15 pages) for the own project</p> <p>Examination prerequisites: Participation in the block seminar</p> <p>Examination requirements:</p>	6 C

Successful completion of the own project	
Admission requirements: none	Recommended previous knowledge: <ul style="list-style-type: none">• Programming experience in C++, C or Python• Parallel programming concepts• Linux
Language: English, German	Person responsible for module: Prof. Dr. Julian Kunkel

Georg-August-Universität Göttingen		3 C 2 WLH
Module M.Inf.2501: Challenges and Perspectives in Neural Data Science		
Learning outcome, core skills: After successful completion of the module, students have gained <ul style="list-style-type: none"> • an overview of recent fundamental research questions and future perspectives in systems and computational neuroscience • an understanding of the neuroscientific background and the data science problems addressed by the relevant research groups • the capabilities to make an informed choice about how to design their further curriculum and where and how to conduct their Master's project 		Workload: Attendance time: 28 h Self-study time: 62 h
Course: Challenges and Perspectives in Neural Data Science (Lecture) <i>Contents:</i> In each lecture, one research group at the Göttingen campus introduces their research questions, neuroscience background and data science methods used.		2 WLH
Examination: Term paper (max. 1000 words), not graded Examination requirements: Based on the content of the lecture series and their own additional research, students formulate a short pitch for a potential Master's thesis project in a neuroscience lab at the Göttingen Campus. The pitch describes the motivation and background of the project, the gap in knowledge, the approach and expected results, as well as the significance of the project. It should be based on at least one published research paper of the group of interest.		3 C
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Alexander Ecker Prof. Dr. Fabian Sinz	
Course frequency: once a year	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: Bachelor: 5 - 6; Master: 1 - 2	
Maximum number of students: not limited		

Georg-August-Universität Göttingen		5 C
Module M.Inf.2541: Current Topics in Computational Neuroscience		2 WLH
Learning outcome, core skills: After successful completion of the module, students <ul style="list-style-type: none"> • have gained a deeper knowledge in specific topics within the field of computational neuroscience • have improved their oral presentation skills • know how to methodically read, critically analyse and discuss original scientific research papers • know how to write an analysis of a specific research field based on their analysis of state-of-the-art research • have improved their ability to work independently in a pre-defined context 		Workload: Attendance time: 28 h Self-study time: 122 h
Course: Current Topics in Computational Neuroscience (Seminar)		2 WLH
Examination: Oral presentation (approx. 30 min) and term paper (max. 5000 words) Examination prerequisites: Regular participation Examination requirements: Knowledge of a current topic in computational neuroscience; ability to present the acquired knowledge in a both orally and in a written report.		5 C
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Alexander Ecker	
Course frequency: irregular	Duration: 1 semester[s]

Additional notes and regulations: The duration of the internship is 2-3 month.		

Georg-August-Universität Göttingen		30 C 2 WLH
Module M.Inf.2901: Master's Thesis		
Learning outcome, core skills: After successful completion of the module, students <ul style="list-style-type: none"> • know how to structure a research paper, • are familiar with formal and structural norms regarding outline, format, bibliography, etc., • understand the principles of good scientific writing, are able to apply them to their own writing and revise manuscripts of others accordingly. By writing the Master's thesis, students are enabled to work on a problem within a defined period of time using the methods of their subject area. Using this concrete problem, they work out the scientific context, select suitable research methods and carry out and evaluate corresponding investigations. On this basis, they arrive at scientifically justified statements.		Workload: Attendance time: 28 h Self-study time: 872 h
Course: Scientific Writing (Course)		1 WLH
Course: Student's Seminar (Colloquium)		1 WLH
Examination: Master's thesis Examination prerequisites: Students submit an outline for their thesis as well as drafts for sections such as abstract, introduction and related work, review drafts by peers and revise their drafts according to peer feedback. Examination requirements: By writing the Master's thesis, students demonstrate that they are able to work on a problem within the specified period of time using the methods of their subject area, to develop an independent, scientifically justified judgement, to arrive at scientifically sound statements and to present the results appropriately in terms of language and form.		30 C
Admission requirements: according to § 12 (1) PStO	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Alexander Ecker	
Course frequency: each semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: Master: 4	

Georg-August-Universität Göttingen Module M.Inf.356-1: Personalized Medicine	3 C (incl. key comp.: 3 C) 2 WLH
Learning outcome, core skills: Die Studierenden kennen die Ziele, Methoden, Anwendungen und Entwicklungen einer personalisierten Medizin. Sie können diese in Bezug auf Anwendungsfelder der personalisierten Medizin in Forschung und Versorgung exemplarisch erläutern. Die Studierenden können die Bedeutung der interdisziplinären Arbeit auf dem Gebiet der personalisierten Medizin erläutern und bewerten.	Workload: Attendance time: 28 h Self-study time: 62 h
Course: Personalized Medicine (Course) <i>Contents:</i> Werden entsprechend der aktuellen Entwicklung dieses Fachgebietes regelmäßig angepasst. Ein regelmäßig überarbeitetes Literaturverzeichnis wird zu Beginn der Lehrveranstaltung ausgegeben.	2 WLH
Examination: Klausur (90 Minuten) oder mündl. Prüfung (ca. 20 Minuten) Examination prerequisites: Regelmäßige und aktive Teilnahme an der Lehrveranstaltung.	3 C
Examination requirements: Die Studierenden beschreiben die Ziele, Methoden, Anwendungen und Entwicklungen einer personalisierten Medizin. Sie können die interdisziplinäre Bedeutung des Themas darstellen und Anwendungsfelder der personalisierten Medizin in Forschung und Versorgung exemplarisch erläutern. Die Studierenden können die Potentiale des behandelten interdisziplinären Forschungsgebietes kritisch bewerten.	
Admission requirements: none	Recommended previous knowledge: Für Medizin-Informatiker wird der vorherige Besuch des Bachelor-Moduls B.Inf.1351: Grundlagen der Biomedizin empfohlen.
Language: German, English	Person responsible for module: UnivProf. Dr. rer. nat. Ulrich Sax Rienhoff, Otto, Prof. Dr. med.

The actual examination type will be published at the beginning of the semester.

NICHT-AMTLICHE FASSUNG

<p>Georg-August-Universität Göttingen Module M.MED.0006: Genetic Epidemiology</p>	<p>6 C 4 WLH</p>
<p>Learning outcome, core skills: Studies in molecular / genetic epidemiology are investigating possible genetic components that are contributing to a disease or, more general, to a phenotype. The studies include population studies and family studies.</p> <p>The difference with classical epidemiology is mainly given by the incorporation of correlations of the genetic structures and of family members or close populations and by the highdimensionality of many studies. The course will discuss the most important study types and statistical and epidemiological methods. The lecture will also give necessary introductions to genetics as well as epidemiology.</p> <p>The students learn about</p> <ul style="list-style-type: none"> • the description of genetically co-determined phenotypes for diseases in populations and families • the discovery of risk factors that are on one hand associated with the phenotype in the population or on the other hand provoke familial aggregations • the modelling of the role of genetic risk factors for diseases on the population and family level • the prediction or risk calculation based on populations or families. 	<p>Workload: Attendance time: 56 h Self-study time: 124 h</p>
<p>Course: Genetic Epidemiology (Lecture)</p>	<p>2 WLH</p>
<p>Course: Genetic Epidemiology (Exercise)</p>	<p>2 WLH</p>
<p>Examination: 1st part examination: ca. 30 minutes oral presentation and written draft (max.10 pages) - contents: critics of the references of 1-2 scientific articles. 2nd part examination: oral examination (ca. 20 minutes)</p> <p>Examination prerequisites: Constant attendance of exercises (80%). At least 50% of the earned points at regular homeworks.</p> <p>Examination requirements: 1. part examination: In the talk together with the write-up they demonstrate that they can apply their knowledge and understanding in the context of a literature by demonstrating an understanding of the study goals, the recruitment, the study design, the materials, the methods and the results. For all this an understanding of why investigators took certain choices and why certain aspects are good or bad are expected in the critique. In particular it is also expected that basic principle of the methods will be understood and looked up even if they are extensions of the direct material covered in class.</p> <p>2nd part examination: The students demonstrate their general understanding of genetic and statistical models and designs. They know about the advantages and disadvantages of the different research questions and designs. They know the general properties of the statistical approaches and can critically assess the appropriateness for specific problems and</p>	<p>6 C</p>

apply them. The exam covers contents of both the lecture and the exercise class.	
Examination requirements: The students demonstrate their general understanding of genetic and statistical models and designs. They know about the advantages and disadvantages of the different research questions and designs. They know the general properties of the statistical approaches and can critically assess the appropriateness for specific problems and apply them. The exam covers contents of both the lecture and the exercise class.	
Admission requirements: none	Recommended previous knowledge: none
Language: English	Person responsible for module: Prof. Dr. Heike Bickeböller

Number of repeat examinations permitted: twice	Recommended semester: 1 - 3
Maximum number of students: not limited	

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.MED.0011: Nonparametric procedures		
Learning outcome, core skills: Part 1: Ranking procedures (tests, confidence intervals, sample size planning) for two and several samples as well as factorial designs involving independent observations. Part 2: Ranking procedures for repeated measures and clustered data, in particular analysis of time curves. All procedures are valid for continuous and discrete metric data as well as ordered categorical data and the common "correction for ties" formulas are shown to be outdated. All procedures are motivated by real data examples which are analyzed in the exercises using different R-packages. To enhance the understanding of the ideas and procedures simple derivations will be presented in the lectures and worked out in the exercises. Several (unfortunately) common misunderstandings of using and interpretation of ranking procedures are discussed, this includes the following misunderstandings: heuristic idea of the rank transform technique, ranking procedures only valid for continuous data, use of rankings in case of skewed distributions, use of rankings for testing the equality of medians.		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Nichtparametrische Verfahren (Lecture) Literatur / Unterlagen: Manuscript of a forthcoming book going to appear in the Springer-Series: Lecture Notes in Statistics or electronic version of this book via SUB, if already printed at the beginning of the semester. Review paper and lecture notes of previous lectures on ranking methods for paired samples and repeated measures procedures.		2 WLH
Course: Nichtparametrische Verfahren (Exercise)		2 WLH
Examination: Written examination (90 minutes) or oral examination (approx. 20 minutes) Examination prerequisites: Achievement of at least 50% of the exercise points Examination requirements: Understanding of the general models, ideas and interpretation of ranking procedures, application of these procedures to practical data set / examples, appropriate use of statistical software for the analysis of examples and correct interpretation of the results. The exam covers contents both of the lectures and the exercises.		6 C
Admission requirements: keine	Recommended previous knowledge: Linear Models and their Mathematical Foundations

NICHT-AMTLICHE FASSUNG

Georg-August-Universität Göttingen Module M.MED.0020: Analysis of Longitudinal and Time-to-Event Data	6 C 4 WLH
<p>Learning outcome, core skills:</p> <p>Description</p> <p>Both longitudinal and time-to-event data frequently arise when observational units such as individuals are followed over a period of time. Longitudinally measured responses, also called repeated measures data, are correlated within subjects and thus require special statistical techniques for valid analysis and inference. Time-to-event data arise when interest is focused on the time elapsing until an event such as onset of infection or death is experienced. Such events may be subject to scientific interest where one tries to understand their cause or establish risk factors. The analysis of time-to-event data is complicated by the issue of censoring, a condition in which the time to the occurrence of the event is only partially known. Occasionally, in a longitudinal study, information on both repeated measurements and the time at which an event of particular interest occurs is collected in the same sample. The purpose of this course is to provide a gentle, yet intense, introduction of the most commonly used statistical methods for analyzing longitudinal and time-to-event data, both separately and jointly. The lectures will be accompanied by tutorials covering both theoretical aspects and the practice of solving applied exercises using the software package R.</p> <p>Contents</p> <p>Part I - Analysis of Longitudinal Data</p> <ul style="list-style-type: none"> • Generalized linear mixed-effects modelling • Generalized estimating equations approach • Latent growth curve modelling <p>Part II - Analysis of Time-to-Event Data</p> <ul style="list-style-type: none"> • Nonparametric estimation and comparison of functions of failure time • Parametric and semiparametric regression modelling • Competing risks and multistate models • Random effects models for related observations <p>Part III - Joint Modelling of Longitudinal and Time-to-Event Data</p> <p>Learning objectives</p> <p>By the end of the course, with reasonable effort, the students will be able to</p> <ul style="list-style-type: none"> • explain key methodological approaches for the analysis of both repeated measures and time-to-event data, • perform appropriate statistical analyses of the resultant repeated measures and/or time-to-event data arising from a longitudinal study, • apply the methods that have been taught to data from a longitudinal study using the software R and interpret the results of such an analysis, • provide methodological guidance with respect to the planning and conduct of a new longitudinal study. 	<p>Workload:</p> <p>Attendance time: 56 h</p> <p>Self-study time: 124 h</p>

Course: Analysis of Longitudinal and Time-to-Event Data (Lecture)	2 WLH
Course: Analysis of Longitudinal and Time-to-Event Data (Tutorial)	2 WLH
Examination: Written exam (90 min.) or Oral exam. (approx. 20 min.) Examination prerequisites: At least 50% of the possible points on the exercise sheets	6 C
Admission requirements: none	Recommended previous knowledge: Linear models and their mathematical foundations

Georg-August-Universität Göttingen Module M.WIWI-QMW.0001: Generalized Regression	6 C 4 WLH
Learning outcome, core skills: The students <ul style="list-style-type: none"> • gain an overview on extended regression modelling techniques that allow to analyse data with non-normal responses. • learn about approaches for modeling nonlinear effects in scatterplot smoothing. • get an introduction to additive models and mixed models for complex regression analyses. • learn how to implement these approaches using statistical software packages. 	Workload: Attendance time: 56 h Self-study time: 124 h
Course: Generalized Regression (Lecture) <i>Contents:</i> Generalized linear models (binary and Poisson regression, exponential families, maximum likelihood estimation, iteratively weighted least squares regression, tests of hypotheses, confidence intervals, model selection and model checking, categorical regression models), nonparametric smoothing techniques (penalized spline smoothing, local smoothing approaches, general properties of scatterplot smoothers, choosing the smoothing parameter, bivariate and spatial smoothing, generalized additive models), mixed models, quantile regression <i>Literatur:</i> Fahrmeir, Kneib, Lang, Marx (2013): Regression - Models, Methods and Applications, Springer.	2 WLH
Course: Generalized Regression (Tutorial) <i>Contents:</i> Generalized linear models (binary and Poisson regression, exponential families, maximum likelihood estimation, iteratively weighted least squares regression, tests of hypotheses, confidence intervals, model selection and model checking, categorical regression models), nonparametric smoothing techniques (penalized spline smoothing, local smoothing approaches, general properties of scatterplot smoothers, choosing the smoothing parameter, bivariate and spatial smoothing, generalized additive models), mixed models, quantile regression	2 WLH
Examination: Written examination (90 minutes) or oral examination (approx. 20 minutes)	6 C
Examination requirements: In the exam, the students demonstrate their ability to choose, fit and interpret extended regression modeling techniques. They show a general understanding of the derived estimates and their interpretation in various contexts. The students are able to implement complex regression models using statistical software and to interpret the corresponding results. The exam covers contents of both the lecture and the exercise class.	
Admission requirements:	Recommended previous knowledge:

none	Module B.WIWI-QMW.0001: Linear Models
Language: English	Person responsible for module: Prof. Dr. Thomas Kneib
Course frequency: each summer semester	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester: 2
Maximum number of students: not limited	
Additional notes and regulations: The actual examination will be published at the beginning of the semester.	

NICHT-AMTLICHE FASSUNG

Georg-August-Universität Göttingen Module M.WIWI-QMW.0002: Advanced Statistical Inference (Likelihood & Bayes)	6 C 4 WLH
Learning outcome, core skills: Upon completion of the module, the students have acquired the following competencies: <ul style="list-style-type: none"> • foundations and general properties of likelihood-based inference in statistics, • bayesian approaches to statistical learning and their properties, • implementation of both approaches in statistical software using appropriate numerical procedures. 	Workload: Attendance time: 56 h Self-study time: 124 h
Course: Advanced Statistical Inference (Likelihood & Baye) (Lecture) <i>Contents:</i> The likelihood function and likelihood principles, maximum likelihood estimates and their properties, likelihood-based tests and confidence intervals (derived from Wald, score, and likelihood ratio statistics), expectation maximization algorithm, Bootstrap procedures (estimates for the standard deviation, the bias and confidence intervals), Bayes theorem, Bayes estimates, Bayesian credible intervals, prior choices, computational approaches for Bayesian inference, model choice, predictions <i>Literatur:</i> Held, Sabanes Bové (2014): Applied Statistical Inference, Springer	2 WLH
Course: Advanced Statistical Inference (Likelihood & Bayes) (Exercise) <i>Contents:</i> The likelihood function and likelihood principles, maximum likelihood estimates and their properties, likelihood-based tests and confidence intervals (derived from Wald, score, and likelihood ratio statistics), expectation maximization algorithm, Bootstrap procedures (estimates for the standard deviation, the bias and confidence intervals), Bayes theorem, Bayes estimates, Bayesian credible intervals, prior choices, computational approaches for Bayesian inference, model choice, predictions	2 WLH
Examination: Written examination (90 minutes) or oral examination (approx. 20 minutes)	6 C
Examination requirements: The students demonstrate their general understanding of likelihood-based and Bayesian inference for different types of applications and research questions. They know about the advantages and disadvantages as well as general properties of both approaches, can critically assess the appropriateness for specific problems, and can implement them in statistical software. The exam covers contents of both the lecture and the exercise class.	
Admission requirements: none	Recommended previous knowledge: none
Language: English	Person responsible for module: Prof. Dr. Thomas Kneib

Course frequency: every year	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester: 1 - 2
Maximum number of students: not limited	
Additional notes and regulations: The actual examination will be published at the beginning of the semester.	

NICHT-AMTLICHE FASSUNG

<p>Georg-August-Universität Göttingen Module M.WIWI-QMW.0009: Introduction to Time Series Analysis</p>	<p>6 C 4 WLH</p>
<p>Learning outcome, core skills: The students:</p> <ul style="list-style-type: none"> • learn concepts and techniques related to the analysis of time series and forecasting, • gain a solid understanding of the stochastic mechanisms underlying time series data, • learn how to analyse time series using statistical software packages and how to interpret the results obtained. 	<p>Workload: Attendance time: 56 h Self-study time: 124 h</p>
<p>Course: Introduction to Time Series Analysis (Lecture) <i>Contents:</i> Classical time series decomposition analysis (moving averages, transformations of time series, parametric trend estimates, seasonal and cyclic components), exponential smoothing, stochastic models for time series (multivariate normal distribution, autocovariance and autocorrelation function), stationarity, spectral analysis, general linear time series models and their properties, ARMA models, ARIMA models, ARCH and GARCH models.</p> <p>Literature</p> <p>Kreiß & Neuhaus (2006): Einführung in die Zeitreihenanalyse, Springer.</p> <p>Rinne & Specht (2002): Zeitreihen - Statistische Modellierung, Schätzung und Prognose, Vahlen.</p> <p>Chatzfeld (2003): The Analysis of Time Series: An Introduction, Chapman & Hall / CRC</p> <p>Shumway & Stożer (2006): Time Series Analysis and its Applications, Springer</p> <p>Schlittgen & Streitberg (2001): Zeitreihenanalyse, Oldenbourg.</p> <p>Lütkepohl & Krätzig (2010): Applied Time Series Econometrics (Themes in Modern Econometrics), Cambridge University Press.</p>	<p>2 WLH</p>
<p>Course: Introduction to Time Series Analysis (Tutorial) <i>Contents:</i> Practical and theoretical exercises covering the content of the lecture. Number of repeat examinations permitted: twice	Recommended semester: 2 - 3
Maximum number of students: 50	

NICHT-AMTLICHE FASSUNG

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.WIWI-QMW.0010: Multivariate Statistics		
Learning outcome, core skills: The students: <ul style="list-style-type: none"> • learn the basic concepts of multivariate data analysis, • know how to apply the most common methods of multivariate statistics in practice, • learn how to implement multivariate statistical approaches using the software package R, • know how to interpret the results of multivariate data analyse. 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Multivariate Statistics (Lecture) <i>Contents:</i> Multivariate distributions and their properties, multivariate normal distribution, principal component analysis, factor analysis, discriminant analysis, cluster analysis Literatur: Everitt, B. S. and Hothorn, T. (2011): An Introduction to Applied Multivariate Analysis with R, Springer.		2 WLH
Course: Multivariate Statistics (Exercise) <i>Contents:</i> Multivariate distributions and their properties, multivariate normal distribution, principal component analysis, factor analysis, discriminant analysis, cluster analysis		2 WLH
Examination: Written examination (90 minutes) or oral examination (approx. 20 minutes) Examination prerequisites: Exercises (50% successful completion)		6 C
Examination requirements: In the exam, the students demonstrate that they are able to apply the basic concepts of multivariate statistics. They can decide for a suitable procedure given an applied problem, implement the approach in statistical software and interpret the results. The exam consists of material from both the lecture and the exercise class.		
Admission requirements: none	Recommended previous knowledge: none	
Language: English	Person responsible for module: Prof. Dr. Thomas Kneib	
Course frequency: once a year	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 2 - 3

	M.WIWI-QMW.0009 Introduction to Time Series Analysis
Language: English	Person responsible for module: Prof. Dr. Helmut Herwartz
Course frequency: once a year	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester: 3 - 4

NICHT-AMTLICHE FASSUNG

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.WIWI-QMW.0016: Spatial Statistics		
Learning outcome, core skills: The students <ul style="list-style-type: none"> • get familiar with basic concepts and examples of stochastic processes. • learn about the principle possibilities to include spatial information in statistical models. • acquire experience in the practical analysis of spatial data • learn how to interpret the results of spatial analyses 		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Spatial Statistics (Lecture) <i>Contents:</i> Stochastic processes in discrete and continuous time, Wiener process, Poisson process, Markov chains, statistical analysis of spatially oriented data, spatial models for point-referenced data (geostatistics, kriging), spatial models for regional data (Markov random fields), spatial point processes, spatial stochastic processes, statistical inference in spatial statistics. Literatur: Diggle, Ribeiro (2007): Model-based Geostatistics, Springer. Rue, Held (2005): Gaussian Markov Random Fields, Chapman & Hall / CRC. Møller & Waagepetersen (2003): Statistical inference and simulation for spatial point processes, Chapman & Hall/CRC.		2 WLH
Course: Spatial Statistics (Exercise) <i>Contents:</i> Stochastic processes in discrete and continuous time, Wiener process, Poisson process, Markov chains, statistical analysis of spatially oriented data, spatial models for point-referenced data (geostatistics, kriging), spatial models for regional data (Markov random fields), spatial point processes, spatial stochastic processes, statistical inference in spatial statistics.		2 WLH
Examination: Written examination (90 minutes) or oral examination (ca. 20 minutes)		6 C
Examination requirements: The students show in the exam that they have learned to perform the basic steps and calculations involved in analyses of stochastic processes and spatial data. They can choose the most appropriate model for a given problem and can implement this model in statistical software. In addition, the resulting estimates can be interpreted and the results can be critically evaluated. The exam covers contents of both the lecture and the exercise class.		
Admission requirements: none	Recommended previous knowledge: none	
Language:	Person responsible for module:	

English	Prof. Dr. Elisabeth Bergherr
Course frequency: once a year	Duration: 1 semester[s]
Number of repeat examinations permitted: twice	Recommended semester: 2 - 3
Maximum number of students: not limited	
Additional notes and regulations: The actual examination will be published at the beginning of the semester.	

NICHT-AMTLICHE FASSUNG

Georg-August-Universität Göttingen		6 C 2 WLH
Module M.WIWI-QMW.0033: Current Topics in Applied Statistics		
Learning outcome, core skills: The students: <ul style="list-style-type: none"> • learn how to study current topics in applied statistics independently and how to make themselves familiar with the state of the art of current research, • learn how to present the current state of the art in a presentation in a way that makes the contents accessible to a wider audience (and in particular other students), • can evaluate current publication with respect to their applicability for a given research question, • can implement novel statistical methods and apply them to empirical data. 		Workload: Attendance time: 28 h Self-study time: 152 h
Course: Current Topics in Applied Statistics (Seminar) <i>Contents:</i> In the seminar, current topics in applied statistics will be presented and discussed by the students.		2 WLH
Examination: Term paper (max. 15 pages) with presentation (ca. 45 minutes) Examination prerequisites: Regular attendance.		6 C
Examination requirements: The students demonstrate their ability to present statistical and econometric models and results and to document their findings in a corresponding report.		
Admission requirements: none	Recommended previous knowledge: M.WIWI-QMW.0002 Advanced Statistical Inference (Likelihood & Bayes), M.MED.0001 Lineare Modelle und ihre mathematischen Grundlagen, M.WIWI-QMW.0021 Introduction to R	
Language: English	Person responsible for module: Prof. Dr. Thomas Kneib	
Course frequency: irregular	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 3 - 4	
Maximum number of students: 15		
Additional notes and regulations: The module is suitable for students of the Master's degree program Applied Statistics, as advanced statistical knowledge is required.		

Georg-August-Universität Göttingen		6 C 4 WLH
Module M.WIWI-QMW.0035: Statistical and Deep Learning		
Learning outcome, core skills: After completing the module, the students are familiar with the current state of research in modern statistical and deep learning algorithms and their practical application. They know the theoretical foundations and the technical implementation of the methods. Students can apply the methods to real data sets and assess the advantages and disadvantages of different methods.		Workload: Attendance time: 56 h Self-study time: 124 h
Course: Statistical and Deep Learning (Seminar) <i>Contents:</i> Introduction to neural networks, minimization algorithms (e.g. Stochastic Gradient Descent), Deep Neural Nets (e.g. Convolutional Neural Nets, Recurrent Neural Nets), application of deep learning algorithms to different objectives (e.g. image recognition, voice recognition, Long-Term Short-Term financial time series), current procedures of Natural Language Processing and Machine Learning techniques (e.g. Random Forests, Support Vector Machines).		4 WLH
Examination: (max. 15 pages) and presentation (approx. 30 minutes)		6 C
Examination requirements: The students demonstrate a basic understanding of deep learning methods. They demonstrate the successful reception of the scientific literature on a specific topic as well as the ability to present their own subject matter in an understandable manner to a foreign audience.		
Admission requirements: none	Recommended previous knowledge: none	
Language: German	Person responsible for module: Dr. Benjamin Säfken, Dr. Alexander Silbersdorff	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 1 - 4	
Maximum number of students: 20		

Georg-August-Universität Göttingen		3 C
Module SK.Bio-NF.7001: Neurobiology		2 WLH
Learning outcome, core skills: The students should acquire comprehension in form and function of neurons and their anatomical and physiological features (genetics, subcellular organization, resting membrane potential, action potential generation, stimulus conduction, transmitter release, ion channels, receptors, second messenger cascades, axonal transport). The students acquire knowledge of the physiological basics of sensory systems (olfactory, gustatory, acoustic, mechanosensory and visual perception) as well as motor control. Based on this the students educe understanding for the relation between neuronal circuits and simple modes of behavior (central pattern generators, reflexes, and taxis movements). The students should conceptually learn how neuronal connections are modified by experience (cellular mechanisms of learning and memory) and should learn different types of modification of behavior based on experience and neuronal substrates. The students should acquire fundamental insight into the organization and function of brains and autonomous nervous systems of mammals and invertebrates. The neurobiological basis of behavioral control (orientation, communication, circadian rhythm and sleep as well as motivation and metabolism) is explained. The students will learn physiological and cellular mechanisms of aging and of neurodegenerative diseases.		Workload: Attendance time: 30 h Self-study time: 60 h
Course: Neurobiology (Lecture)		2 WLH
Examination: Written examination (90 minutes)		3 C
Examination requirements: The students should have the ability to assess coherence and facts of statements from the field of neurobiology; they should be able to answer questions on the structure and function of neurons and neuronal circuits. Furthermore they should be able to describe and compare neuronal basics of behavioral control, their experience-dependent modification and conceptual mechanisms of complex behavior; they should be able to describe and compare physiological mechanisms of sensory perception and different sensory modalities; they should be able to describe physiological and cellular mechanisms of aging and of neurodegenerative diseases.		
Admission requirements: none	Recommended previous knowledge: Basic knowledge in Biology	
Language: English	Person responsible for module: Prof. Dr. Andre Fiala	
Course frequency: each summer semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 4 - 6	
Maximum number of students: 30		

Additional notes and regulations:

The combination of this module with module SK.Bio.7001 is not possible.

NICHT-AMTLICHE FASSUNG

Georg-August-Universität Göttingen		3 C 2 WLH
Module SK.Bio.357: Biological psychology III		
Learning outcome, core skills: The students acquire knowledge of advanced principles and concepts of neuroscientific biopsychology in the fields of the development of the nervous system, neuroplasticity, pain, multisensory integration, sensomotrics, sensory information processing, decision making, executive functions, attention, psychopharmacology, psychopathology.		Workload: Attendance time: 28 h Self-study time: 62 h
Course: Biologische Psychologie III (Lecture)		2 WLH
Examination: Written examination (60 minutes) Examination requirements: The students prove that they have achieved the above-mentioned learning objectives.		3 C
Admission requirements: none	Recommended previous knowledge: SK.Bio.355, SK.Bio.356	
Language: German	Person responsible for module: Prof. Dr. Alexander Gail	
Course frequency: each winter semester	Duration: 1 semester[s]	
Number of repeat examinations permitted: twice	Recommended semester: 3 - 5	
Maximum number of students: 20
